

DEWATERING AFFIDAVIT

Rev: 3 | Revision Date: 7/22/2019 | I.D. Number: DSD-E-DA

STATE OF FLORIDA
COUNTY OF BROWARD

Before me this day personally appeared _____, Contractor of the referenced
Master Permit # _____, for work at the following address:

who, being duly sworn, deposes and says that they have investigated and determined through available resources or technologies the existing groundwater for this site.

The Contractor has evaluated that under the permit application he/she has determined the following applies for the work listed under the permit referenced above (CONTRACTOR SHALL INITIAL ONE of the 3 Items BELOW):

1. No dewatering anticipated
2. Dewatering is anticipated and existing site conditions allow for groundwater discharge to be maintained on-site through approved dewatering technologies and methods. Contractor shall ensure proper equipment and materials remain in place and that approved dewatering plan is followed. No discharge shall occur to adjacent properties, water bodies or City Right of Way. In the event dewatering is required to be discharged off-site, CONTRACTOR shall obtain an Engineering Permit from the City of Fort Lauderdale and other jurisdictions prior to execution of the dewatering activities.**

** Please be advised a dewatering permit from Broward County Environmental Protection Department (EPD) is required for sites within ¼ mile of a known contamination site. A map of contaminated sites can be found at: [Broward County Contaminated Sites](#) or contact Norman Arrazola at narrazola@broward.org or 954-519-1237 to make this determination. Please initial below as applicable:

- 2a. Site is not within ¼ mile of a known contaminated site.
- 2b. Site is within ¼ mile of a known contaminated site. A copy of Broward County EPD permit is included as required.
3. DEWATERING PERMIT REQUIRED - Dewatering is required and existing site conditions and / or limits of work will require groundwater to be discharged off-site through appropriate and approved methods. All proper permits, including an Engineering Permit-DEWATERING (GDWTR) from the Department of Sustainable Development and other applicable jurisdictions, as necessary, shall be obtained prior to execution of any dewatering activities. Contractor shall ensure that proper materials and equipment remain in place throughout all dewatering activities and shall call for all necessary inspections to complete the work in conformance with the permitted conditions in the permit.
