

CITY OF FORT LAUDERDALE

First Notice of Upcoming Improvements

The City of Fort Lauderdale is taking proactive measures to strengthen our infrastructure and improve our roads to help our neighbors travel quickly and safely throughout our community.

We are pleased to inform you that the City is working with Asphalt Paving Systems to conduct micro-surfacing on your street. The first step of this three-step process is to apply crack seal within approximately 48 hours of receiving this notice.

During work hours, workers on site will coordinate traffic. You will continue to be able to access your street, and we will do our best to minimize any inconvenience while we perform work in your neighborhood. We ask for your assistance to ensure we can complete the work as quickly and efficiently as possible.

- Please do not park any vehicles, including boats, or trailers, in the roadway between 7:00 a.m. and 6:00 p.m.
- Any contractors that normally place debris in the roadway for pick-up (gardeners, etc.) are asked to refrain from doing so on the scheduled day of crack sealing and for several days afterwards (if rain has caused a delay in the schedule). The day after your road is sealed, you can resume normal operations.
- Please do not run irrigation systems between 2:00 a.m. and 7:00 p.m. during the crack seal application phase. Irrigation systems can return to normal schedule the day after the crack seal is applied.

In 30 to 45 days you will receive a second notice approximately 24 to 48 hours before the re-surfacing part of the project will begin.

We appreciate your patience as we strive to fulfill the community vision by creating “The City You Never Want to Leave.” For more information on the micro-surfacing project, please visit the City website at www.fortlauderdale.gov/microsurfacing.

APPROX. CRACK SEALING START DATE - - 2015
