

SEWER SYSTEM IMPROVEMENTS RESCHEDULED

CONSTRUCTION UPDATE – MAY 2026

Crews have restored the work zone and reopened SE 10th Avenue.

Beginning in April 2026, crews encountered unexpected groundwater conditions that made accessing the underground sewer pipe more challenging than anticipated. Over the past few weeks, the team has gained a clearer understanding of the area’s underground conditions and now expects to perform the work in late summer 2026, using additional equipment to dry the area surrounding the pipe.

Neighbors will be notified once the work is scheduled. Please note that the boundaries of the work area may shift to support the updated construction approach. The revised schedule remains subject to change based on weather or other unforeseen circumstances.

PROJECT OVERVIEW

The City of Fort Lauderdale is working with Lanzo Construction Co. to make improvements to the City's sewer system along SE 10th Avenue between SE 2nd Street and E. Broward Boulevard in Beverly Heights.

The work includes:

- Cured-in-place pipe (CIPP) lining of approximately 450 feet of sewer lines
- Restoring the roadway, sidewalks and landscaping as needed

CIPP lining is a trenchless method to rehabilitate underground sewer lines and extend their longevity while minimizing excavation and disruption.

**ORIGINAL
WORK AREA**

- █ Local traffic only
- █ Detour routes

We sincerely appreciate your patience and understanding as we complete this important infrastructure improvement. Neighbors with questions or concerns may contact the project hotline listed below.
