UTILITY SERVICES HYDRANT FLOW TEST APPLICATION

Rev: 8 | **Revision Date:** 11/19/2026 | **I.D. Number:** E-ENG-55

PURPOSE

The purpose of the Hydrant Flow Test application is to formally request and authorize the City of Fort Lauderdale's Utility Services Division to perform a hydrant flow test at a specified location. This test provides accurate water pressure and flow data needed for engineering design, fire protection planning, permitting, and verification of system capacity. The application ensures all required project, asset, and applicant information is collected; that appropriate fees are submitted; and that City staff can schedule, conduct, and record flow test results in accordance with Development Services Department – Engineering and Utility Services procedures.
