Case Number: PRE18005

CASE COMMENTS:  PRE18005

1. Conflicting information on Sheet A-00. Under scope of work the proposal is for 10 units. Site plan shows 12 units.
2. Parking will require meeting ADA requirements.

Please Consider the Following:

1. To meet the definition of a Townhouse as an R-3 occupancy the property must comply with following requirements as defined in the 2017 Florida Building Code-Building and the 2017 Florida Building Code-Residential in Chapter 2 of both versions of the Code, specifically; “two or more attached units with property lines separating such units in which each unit extends from the foundation to the roof”. To be considered as Group R-3 each unit is required to on individual parcels.

2. Florida Building Code(2017) Section 903.2.11.3.1 will require “fire protection sprinklers” “to all multiple-family residential buildings, whether designated as townhouses, condominiums, apartment houses, tenements, garden apartments or by any other name”. “Section 553.895(2) FS, townhouses that are three or more stories tall and consist of three or more units together are considered multiple family dwellings”. “Therefore, these types of townhouses are not exempt” “for the requirements to provide fire protection sprinklers” in lieu of “other definitions that define a townhouse as a single-family residence”.

GENERAL COMMENTS

The following comments are for informational purposes.

Please consider the following prior to submittal for Final DRC:

1. The Florida Building Code shall apply to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.

2. All projects must consider safeguards during the construction process. Florida Building Code Chapter 33 delineates various safeguards that may apply during the construction phase. All structures associated with the protection of pedestrians will require a separate permit. A licensed professional must sign and seal the plans and specifications.

3. The City of Fort Lauderdale is a participating municipality in the National Flood Insurance Program (NFIP). The requirements specific to the City of Fort Lauderdale can be found in Chapter 14 - FLOODPLAIN MANAGEMENT of the Code of Ordinances and accessed at:

Please consider the following prior to submittal for Building Permit:

1. On January 1st, 2018 the 6th Edition of the Florida Building Code was adopted. All work described in Section 101.2, of the Broward County Administrative portion of the Florida Building Code, will govern the administration and enforcement of the proposed work. Each building and or structure will require a separate permit. The following websites will assist in the design considerations:

Building Code Comments and General Guidelines:

The following comments are for informational purposes:

1. Permit Applications [F.B.C. 2017-105.3.1.4], Detailed valuation [F.B.C. 2017-109.3]
2. Signed and sealed plans [F.B.C. 2017-107.3.4.0.4] Non SFR over $15,000 [F.B.C. 2017-107.3.4.0.1] Work on S.F.R. over $30,000 [F.B.C. 2017-107.3.4.0.3]
3. Site plan Details [F.B.C. 2017-107.3.5A(1)] setbacks. N. ___, E. ___, S. ___, W. ___
4. Finished Floor. _____, Flood Zone. ____. Flood vents hazard details [F.B.C. 2017-107.3.5A(8)n]
5. Geotechnical Report with recommendations [F.B.C. 2017-107.3.5A.(8)a] or Positive soil statement
6. Broward County Environ. Review Certificate, All additions or new Construction. [F.B.C. 105.2.3.4]
7. Special Inspector form completed [F.B.C. 2017-110.10.1-2]
8. Special Inspector Plan [F.B.C. 2017-107.3.4.3] Threshold Bldg. [F.B.C. 2017-107.3.5A(8)]
9. R3 or R2 Townhomes HVHZ design calculations, [F.B.C. 2017-107.3.5.2]
10. Building structural calculations [F.B.C. 2017-107.3.5A(8)] if required
11. Plans insufficient MEPS, Details [F.B.C. 2017-107.3.5.1] Shop Dwrgs. [F.B.C. 2017-107.3.5.2]
12. Area breakdown: AC, garage, covered porch, balconies, [F.B.C. 2017-107.3.5.1] Per floor_____ x__ A/C _________ Total Area Under Roof_______ Building Footprint_______ Roof_______
13. Product approvals accepted by designer of record: windows, doors, roof, garage doors, Etc. [F.B.C. 2017-107.3.5.4]
14. Occ. Classification, Min. Type construction, Code submitted to: [F.B.C. 2017-107.3.5A(2) and (3)] Ex. Occ. Class R3, Type VB FBC 2017 Fifth Edition
15. Floor plan dimensioned including window door schedule and attic access [F.B.C. 2017-107.3.5.1]
16. Fire required draft stopping, opening protection, fire rated wall details [F.B.C. 107.3.5A(4)]
17. Occupancy Load and Egress requirements [F.B.C. 2017-107.3.5A(7)] Occupancy Load ________
18. Bedroom Light and Ventilation Requirements (F.B.C. 2017-107.3.5A(11))
19. Accessibility requirements: Ex. Res. (1) 29” Clear toilet Rm. Door [F.B.C. 2017-107.3.5A(10)]
20. Attic ventilation calculations or Icynene [F.B.C. 2017-107.3.5D(3)] Flame Spread Max 25 Icynene
21. Building Elevations showing beam and overall roof Ht. Roof drains, [F.B.C. 2017-107.3.5]
22. Guards, handrails, stair detail, landings outswing doors, buck attachments [F.B.C. 2017-107.3.5.1]
23. Chapter 16 Main frame wind requirement criteria: Ex. ASCE 7-10 Etc. [F.B.C. 2017-107.3.5A(8)c.d.e)]
24. Structural plan Req.: foundation, wall, tiebeam, roof schedules [F.B.C. 107.3.5A(i.j.k.)]
25. Roof framing: truss anchors and uplifts including permanent bracing [F.B.C. 107.3.5A(8)k]
26. Worst case wind loads PSF (Pos.+ Neg.-) for window and door openings [F.B.C. 107.3.5A(8)c]
27. Gable End detail / beam elevation changes / rake beam details [F.B.C. 2017-107.3.5.2]
28. Structural elements Spec.’s (wood, steel, etc.), schedule, sufficient detail [F.B.C. 2017-107.3.5.2]
30. All fenestration and insulated areas to comply with F.B.C. Energy Conservation 2017 R402.4.1.1
Case Number: PRE18005

CASE COMMENTS:

Prior to subsequent DRC submittal, please address the following Preliminary DRC review comments:

1. Meet the City’s Adequacy requirements to services provided to the public (fire service, water, wastewater, stormwater, transportation, etc.), per ULDR Section 47-25.2 of the City’s Code of Ordinances. Assess potential demands and impacts on City services and prepare a design for each that utilizes existing water, wastewater, stormwater, and transportation infrastructure to adequately serve this project. If the adequate infrastructure is not available, prepare a design that extends/expanded the connection to the nearest City system to adequately serve this development.

   a. Prepare service demand calculations for water & wastewater services and obtain a letter of service availability from the City’s Public Works – Engineering Department. Please contact Rohan Punit at 954-828-5859 or rpunit@fortlauderdale.gov.

2. All proposed improvements within or adjacent to the Florida Department of Transportation (FDOT), Broward County Highway Construction & Engineering Division (BCHCED), and City Right-of-Way are subject to issuance of a Right-of-Way permit from the authority having jurisdiction. This shall include the execution of an agreement that authorizes those entities the authority to remove improvements for any public purpose in the future.

   Please coordinate and provide approval or written correspondence (as appropriate) from the following agencies for the improvements along:

   a. State Road 870 / W Commercial Boulevard – FDOT.

3. Provide documentation from the Broward County Planning Council (BCPC) verifying whether the site requires platting / re-platting. The documents from BCPC shall be submitted to the City’s engineering reviewer; the BCPC may be contacted at (954) 357-6695.

4. ALTA / ACSM Land Title Survey: The title commitment or Opinion of Title must have an effective date no more than thirty days prior to the date of submittal of the survey and must be certified to the City of Fort Lauderdale. Elevations shall be referenced to the North American Vertical Datum of 1988 (NAVD 88).

5. Discuss status of existing encumbrances such as easements (including whether public or private) shown on ALTA / ACSM Land Title Survey: 30’ Utility Easement and 40’ Utility Easement, as well as adjacent 15’ Utility Easement and 44’ Ingress/Egress & Utility Easement. Vacation of any platted Utility Easement would require a separate DRC submittal, DRC staff support, and City Commission approval.

6. Submit a formal Site Plan that features all critical dimensions for the proposed development, such as building setbacks, parking lot access, sidewalk dimensions, and typical roadway travel lane widths for State Road 870 / W Commercial Boulevard.

7. Existing property boundary delineated in proposed development plans shall be consistent with that shown in corresponding ALTA / ACSM Land Title Survey.

8. Proposed parking lot improvements on adjacent private property (i.e. to the south and west) would require written permission from those property owners.
9. Per ULDR Section 47-19.4.D.6, all dumpster enclosures and adjacent service access drive shall be placed on poured concrete, solid or perforated interlocking concrete block paving (ICB), or any existing hardened paving system.

10. Provide preliminary Water and Sewer Plan that features proposed connections to City infrastructure, including limits of any existing City water main and/or sanitary sewer infrastructure to be removed and/or modified, and location of all existing utilities in vicinity of the proposed improvements (that may be in conflict).

11. Provide preliminary Paving, Grading, and Drainage Plan to demonstrate how stormwater runoff will remain onsite (include typical cross-sections along all property lines as appropriate), and how the proposed project improvements (i.e. on-street parking, sidewalks, etc.) will not adversely impact the adjacent Right-of-Way.

12. Provide the storm runoff calculations (signed and sealed by a Florida registered professional engineer). The calculations shall show how the minimum road crown and finished floor elevations are met, and how the 25-year, 3-day storm event is maintained on site with zero discharge to Right-of-Way and adjacent properties. Any site that goes through DRC must store at least the 25-year 3-day event on-site, unless proposed drainage design is based on Pre vs. Post analysis. Please also comply with the City of Fort Lauderdale Comprehensive Plan (Ordinance C-08-18), Objective 4.1 under Infrastructure Elements, and be advised that effective 7/1/2017, all projects must comply with the Broward County ‘Future Conditions Average Wet Season Groundwater Level’ map.

13. Coordinate with Public Works – Utilities Division for any connections to and/or demolition of existing City infrastructure along State Road 870 / W Commercial Boulevard.
   a. For Sanitary Sewer, contact Steve Roberts, Jr. at 954-828-7855 or srobertsjr@fortlauderdale.gov. Per ULDR Section 47-19.4.D.7, dumpsters serving restaurants require grease traps, oil / sand separators, and drains connecting to sanitary sewer.
   b. For Water Distribution, contact Keith Hutchison at 954-828-7682 or khutchison@fortlauderdale.gov. Public Works Operations does not allow 90 degree bends within the City’s Right-of-Way.
   c. For City Utility Atlas Maps, GIS, and as-built information, to help accurately plot and label utilities in the vicinity of proposed work, email plan@fortlauderdale.gov.
   d. Provide written correspondence between the Public Works – Utilities Distribution and Collection Division and the Engineer of Record.

14. Evaluate the possibility of utilizing a sustainable stormwater approach with the possibility of low impact (cisterns, pervious pavers, bioswales, rain gardens, etc.) uses for landscaping along the streetscape.

15. Provide support data that this site meets the fire hydrant locations and distribution as per the National Fire Protection Association (NFPA) Codes and Standards. Clearly show all existing and proposed fire hydrants and 500-foot radius of coverage area; note that a fire hydrant shall be installed within 100 feet of the Fire Department Connection.

16. Please see Attachment ‘A’ for General Advisory Information (Engineering).
ATTACHMENT ‘A’ - GENERAL ADVISORY INFORMATION (ENGINEERING):

1. Meet the City’s Adequacy requirements for services provided to the public (fire service, water, wastewater, stormwater, transportation, etc.), per ULDR Section 47-25.2 of the City’s Code of Ordinances. Assess potential demands and impacts on City services and prepare a design for each that utilizes existing water, wastewater, stormwater, and transportation infrastructure to adequately serve this project. If the adequate infrastructure is not available, prepare a design that extends/expands the connection to the nearest City system to adequately serve this development.

   a. Dedication of rights-of-way: Please be advised that if Right-of-Way and/or Right-of-Way Easements (per the Broward County Trafficways Plan), including corner chords (per ULDR Section Section 47-24.5.D.1.p.vi), are waived by FDOT and/or BCHCED (provide written correspondence), the dedications will still be requested by the City of Fort Lauderdale.

   b. Transportation/Pedestrian facilities: Sidewalks, pedestrian crossing and other pedestrian facilities shall be provided to encourage safe and adequate pedestrian movement on-site and along roadways to adjacent properties. Transit service facilities shall be provided for as required by the city and Broward County Transit. Pedestrian facilities shall be designed and installed in accordance with city engineering standards and accepted applicable engineering standards.

   c. Stormwater: Adequate stormwater facilities and systems shall be provided so that the removal of stormwater will not adversely affect adjacent streets and properties or the public stormwater facilities and systems in accordance with the Florida Building Code, city engineering standards and other accepted applicable engineering standards.

   d. Potable water: Adequate potable water service shall be provided for the needs of the proposed development. The proposed development shall be designed to provide adequate areas and easements which may be needed for the installation and maintenance of potable water systems in accordance with city engineering standards, the Florida Building Code, and applicable health and environmental regulations. The existing water treatment facilities and systems shall have sufficient capacity to provide for the needs of the proposed development and for other developments in the service area which are occupied, available for occupancy, for which building permits are in effect or for which potable water treatment capacity has been reserved. Capital expansion charges for water and sewer facilities shall be paid by the developer in accordance with Resolution 85-265, as it is amended from time to time. Improvements to the potable water service and system shall be made in accordance with city engineering standards and other accepted applicable engineering standards.

   e. Wastewater: Adequate wastewater services shall be provided for the needs of the proposed development. The proposed development shall be designed to provide adequate areas and
easements which may be needed for the installation and maintenance of a wastewater and disposal system in accordance with applicable health, environmental and engineering regulations and standards. The existing wastewater treatment facilities and systems shall have adequate capacity to provide for the needs of the proposed development and for other developments in the service area which are occupied, available for occupancy, for which building permits are in effect or for which wastewater treatment or disposal capacity has been reserved. Capital expansion charges for water and sewer facilities shall be paid by the developer in accordance with Resolution 85-265, as it is amended for time to time. Improvements to the wastewater facilities and system shall be made in accordance with the city engineering and accepted applicable engineering standards.

Sanitary sewer facilities: Prepare service demand calculations for water & wastewater services and obtain a letter of service availability from the City’s Public Works - Engineering Department. Please contact Rohan Punit at 954-828-5859 or rpunit@fortlauderdale.gov.

i. If the system is tied into the city treatment facility, the available capacity shall be determined by subtracting committed capacity and present flow from the design capacity. If there is available capacity, the city shall determine the impact of the proposed development utilizing Table 3, Water and Wastewater, on file with the department.

ii. If there is adequate capacity available in the city treatment plant to serve the proposed development, the city shall reserve the necessary capacity to serve the proposed development.

iii. Where the county is the projected service provider, a written assurance will be required.

iv. Where septic tanks will be utilized, the applicant shall secure and submit to the city a certificate from the Broward County Health Unit that certifies that the site is or can be made suitable for an on-site sewage disposal system for the proposed use.

2. Prepare and submit the following Civil Engineering drawings as part of DRC submittal, signed and sealed by a Florida registered professional Civil Engineer:

   a. Paving, Grading, and Drainage Plan, including any existing public storm drain infrastructure adjacent to the proposed development (show all pipe materials and sizes on the plan) to demonstrate how stormwater runoff will remain onsite (provide sufficient spot elevations around building footprint, landscape areas, and property lines). Please be advised that all proposed storm drains with City Right-of-Way shall be constructed with Reinforced Concrete Pipe (RCP).

   b. Water and Sewer Plan, including any existing water mains, force mains, gravity mains, etc. (show all pipe materials & sizes on the plan). Please be advised that all proposed water mains constructed within City Right-of-Way shall be Ductile Iron Pipe (DIP).

   c. Erosion and Sediment Control Plan, to be reviewed for the drainage impacts to adjacent properties, surrounding Right-of-Way, stormwater facilities, and neighboring water bodies. Please be advised that proposed silt fence taller than 30” is not allowed within sight triangles.

   d. Signing and Marking Plan, including details, and label radii of all landscaping and pavement areas.

   e. Provide typical cross-sections along all property lines, including at driveway access points, on-street parallel parking lanes, and at landscape areas as appropriate. Show how the existing and proposed grades will tie to one another, and how stormwater runoff will remain onsite. Also, show spot elevations along the perimeter (property lines) on the Paving, Grading, and Drainage Plan.

3. All existing driveways (accessing City Right-of-Way) not being utilized by the proposed development shall be fully removed and areas restored as appropriate.

4. Per ULDR Section 47-19.4.D.6, all dumpster enclosures and adjacent service access drive shall be placed on poured concrete, solid or perforated interlocking concrete block paving (ICB), or any existing hardened paving system; in cases where a hard surface or drive which is adequate to support the combined full weight of the bulk container, the enclosure and service vehicles does not
exist, a 10’ wide hard surface extension directly in front of the bulk container shall be required for purposes of emptying the container.

5. Provide ADA accessibility, required within public Right-of-Way and areas of public accommodation within private property, in accordance with Chapter 553 of the Florida’s Statutes, “Accessibility of Handicapped Persons” and latest edition of “Accessibility Requirements Manual” by Department of Community Affairs Florida Board of Building Codes and Standard and in accordance with American Disability Act (ADA).

Final construction checklist item shall include Engineer of Record (EOR) inspection of ADA accessible route(s) for the proposed development, and have necessary repairs made as appropriate.

6. EOR to perform due diligence to field verify all existing utilities (including those shown in City Utility Atlas Maps); coordinate with franchise utility owner for required undergrounding of overhead lines, and provide routing layout on Civil and Landscape plans as appropriate.

7. Applicant shall not connect the on-site drainage system to those within the adjacent public Right-of-Ways of FDOT, BCHCED, and the City of Fort Lauderdale.

8. Provide drainage pipes to drain structural soil (per Silva Cell specifications or approved equal) at proposed tree planting areas; coordinate Civil plans with Landscape plans as appropriate.

9. Provide Demolition and Utility Disposition Plan for any existing building structures, paved areas, walls, underground utilities, etc.

10. Provide Utility Connection Plan for all franchise utilities, such as AT&T, Comcast, FP&L, Teco, etc.

11. Provide dedicated fire service connection (i.e. not combined with domestic water service connection), as applicable per the NFPA guidelines, for the proposed development. Buildings with fire pumps must have an adequate and reliable capacity and shall be of single supply as per AHJ per NFPA 24 2.3. Per NFPA 13 23.1.3.2 (2007 ed.), when a single supply serves a main less than 6 in., then it may serve both domestic and fire systems. If fire main required is larger than 6 in. must be single use and dedicated to fire service.

12. Please be advised that Drainage Well, Backflow Preventer, etc. assemblies shall be located within proposed development, and not within the City's Right-of-Way or permanent easements; coordinate proposed location(s) within the respective FDOT and BCHCED jurisdictions as appropriate.

13. Any road cuts for utilities or curb cuts within in the City Right-of-Way shall be restored to full lane width for 50’ minimum length, per City Code of Ordinances Section 25-108; show and label in plans as appropriate. Verify with FDOT and/or BCHCED their requirements for any milling and asphalt pavement restoration in vicinity of proposed road cuts for utilities and/or curb cuts within their respective Right-of-Way jurisdictions.

14. Prior to obtaining demolition permit, document with digital photos (including Key Map) and/or videos of the existing condition of the City’s Right-of-Way adjacent to the proposed development. Current photos (not Google Street View images) and/or videos should include vantage points of the entire City Right-of-Way frontage adjacent to the proposed development, from both directions along City roadways and/or alleys, as well as of any other notable existing features.

15. Submit the State of Florida Notice of Intent (FAC 62-621.300(4)(b)) per the Florida Department of Environmental Protection (FDEP) criteria. Notice is required for sites of one (1) acre or larger site area with the potential for discharge of sediments to surrounding surface waters or drainage systems.
which discharge indirectly to those surface waters as classified or otherwise identified in the Florida Administrative Code (FAC). Therefore, the Applicants whose projects disturb one or more acres of soil or whose projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres, are required to obtain coverage under the General Permit for Discharges of Storm Water Associated with Construction Activity.

16. All proposed improvements within or adjacent to the FDOT, BCHCED, and City Right-of-Ways are subject to coordination with and issuance of a permit from the said entities (for proposed driveways, sidewalks, etc.), as well as the execution of an agreement that authorizes those entities for removing the improvements for any public purpose in the future. The Applicant shall also execute a maintenance agreement with the appropriate FDOT, BCHCED, and City entities attesting that all improvements, including landscaping, hardscaping, drainage system, lighting, etc., proposed within or adjacent to the public Right-of-Way will be maintained by the Applicant throughout the life of the improvements.

Please note that all easements and maintenance agreements shall be recorded prior to final permit close out and Certificate of Occupancy issuance.

17. Obtain a Transportation Concurrency Satisfaction Certificate from the Broward County Planning and Environmental Regulation Division (BCPERD). Please contact Howard Clarke at 954-357-5760 or hoclarke@broward.org at BCPERD to determine whether the project is subject to the Transportation Concurrency Fees. In addition, please contact Pierre Dougniaux with the Broward County Transit Division at 954-357-8304 to determine what (if any) improvements are suggested to ensure mobility needs are adequately met for this proposed site.

18. Obtain a general or surface water management license from the Broward County Environmental Protection & Growth Management Division (BCEPGMD). Route certified calculations with Paving & Drainage plans to the engineering reviewer.

19. Route and obtain approval from Broward County Traffic Engineering Division on any pavement marking and striping plans within City Right-of-Way.

20. Verify the means for demolishing existing structures on the property so that appropriate timely notice and coordination can be executed with the City Public Works Utilities, and franchise utility companies to control impacts from the demolition. Please be advised that a permit is required for demolishing work activities.

21. Prepare an appropriate staging plan, which includes phasing and information regarding the site layout of the temporary construction measures. The purpose of this plan is to identify the temporary construction measures that will be used to protect the general public, adjoining properties, and minimize the impact of the construction on neighboring transportation system, landscaping, Right-of-Way encroachments, and businesses. The items to be addressed by the staging plan shall include but not limited to the following:

a. Submit a Construction Phasing Plan clearly depicting the phasing of construction if applicable. The plan shall show the following:
   1) Include a narrative for each phase along with roadways utilized for materials delivery.
   2) Clearly show boundaries of the site, dimensions, and names of all streets and alleys, direction of travel, bike lanes, on-street parking, and sidewalks.
   3) Show location of job trailers or construction offices for the staff, general contractor, and subcontractors with Finished Floor Elevations.
4) Show location, type, and size of temporary construction fencing, including locations of gates and gate swing radii. If corners of the fence correspond with cross streets, propose a fence boundary that will not obstruct sight lines for motor vehicles.

5) Show location and type of construction crane(s), including span radius.

6) Indicate location and number of portable restrooms, dumpsters, and trash chutes.

7) Show location of the Fire Department Connection during construction and a water supply (hydrant) in accordance with NFPA.1, Chapter 29.

8) Show location of any sidewalk to be closed or protected as required by Chapter 33 of the Florida Building Code.

9) Indicate location and time frame of any street closures (part or entire street) with a detour signage plan meeting MUTCD standards, prepared by a Certified Traffic engineer or technician. Please be advised that the City Commission approval will be required for detours and street and sidewalk closures lasting over 72 hours, and the said approval may take eight (8) weeks or more.

10) Show all existing parking spaces that may be affected by the construction (or construction phasing) and indicate all parking spaces that would be included within proposed construction boundaries for each phase.

11) Show location of parking for inspectors and construction personnel. Include all off-site parking - location, period of lease and number of spaces leased. If shuttle will be provided between parking and job site – give shuttle schedule and show the route of the shuttle.

12) Show loading/unloading areas for material delivery to include entry and exit path of vehicles without backing into the street.

13) Show routes that delivery trucks will be instructed to follow when traveling to and from the site. All efforts should be made to avoid residential and/or small, merchant lined streets. This may be shown in a separate drawing, prepared at an appropriate scale in order to illustrate route through the City.

14) Indicate where and how concrete trucks will stage during multiple yardage pours.

15) Provide an Erosion Control Plan and show location and type of silt fencing for dust control along with measures for erosion control against material leaving the site from vehicular traffic.

16) Indicate the locations of storm inlets. If physical measures will be taken to protect inlets, illustrate these on the Erosion Control Plan.

17) Show locations of truck wash-off area and procedures, including tires and concrete chutes.

18) Indicate schedule for street sweeping of periphery of the construction site.

19) Indicate if dewatering is proposed.

22. A dewatering permit from Broward County Environmental Protection Department (EPD) is required for sites within ¼ mile of a known contamination site. A map of contaminated sites can be found at http://bcgis.maps.arcgis.com/apps/OnePane/basicviewer/index.html?appid=5d9ec5c1eb614c8b88d8990f48b15b7a or contact Norman Arrazola at narrazola@broward.org or 954-519-1237 to make this determination.

23. Apply and obtain a South Florida Water Management District (SFWMD) dewatering permit activities if off-site discharge is anticipated. Any planned activity that requires dewatering needs to be reviewed by SFWMD. In many cases, this could involve an email to SFWMD that include a description of the activity. If no permit is required, SFWMD will let you know. The SFWMD contact person is Steve Memberg (smemberg@sfwmd.gov).

24. Pay Capital Expansion Fees for water and wastewater treatment, distribution, and disposal at the rate identified in City Ordinance C-05-21. The fee will be calculated based on Equivalent Residential Connections (ERC’s); provide a calculation for both existing and proposed ERC’s as appropriate. Impact Fees shall be paid prior to the issuance of the building permit.
25. Any lighting within the City’s Right-of-Way shall be approved and authorized by the City’s Engineering and/or Building (Electrical Staff) Department. Any lighting placed in the Right-of-Way shall be powered by an approved lighting circuit from the proposed development or FPL source and will require an engineering permit. Any new lighting system powered by private source shall require a Revocable License Agreement with the City along with a “disconnect” that shall be accessible by Facilities Maintenance staff in or near the Right-of-Way. Please contact the Facilities Maintenance Office, David Smith at 954-828-6560, for information concerning the lighting within the City’s Right-of-Way.

26. Obtain a franchise utility engineering permit before installing, removing, or relocating poles (lighting or electrical) within the City’s Right-of-Way. Permanent or temporary relocations or removals shall be reviewed and approved by the City.

27. Please discuss locations/relocation of the underground utilities with the City Public Works Department - Utilities, Rick Johnson at 954-828-7809 or rjohnson@fortlauderdale.gov, as well as proposed methods of noise, vibration, and odor mitigation.
**Case Number:** PRE18005

**CASE COMMENTS:**

Please provide a response to the following:

1. The City has adopted Florida Friendly Landscaping requirements into our ULDR Section 47-21. This basically means that plant material must be grouped together based on watering needs, and turf areas must be limited and/or consolidated. The planting areas are to be irrigated on a separate zone than the turf areas. Once plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Please visit MuniCode to view the updated Landscape & Tree Preservation ordinance including native, pervious, and turf required percentages [https://www.municode.com/library/fl/fort_lauderdale/codes/unified_land_development_code?nodeId=UNLADERE_CH47UNLADERE_ARTIIIDERE_S47-21LATRPRRE](https://www.municode.com/library/fl/fort_lauderdale/codes/unified_land_development_code?nodeId=UNLADERE_CH47UNLADERE_ARTIIIDERE_S47-21LATRPRRE)

2. Provide street trees in the right of way swale area, as per ULDR 47-21.13.B.16. Street trees are to be a minimum of 12 feet tall and provided at a ratio of one street tree per forty feet of street frontage or greater fraction thereof not subtracting ingress and egress dimensions. When overhead utilities exist, required street trees may be small trees provided at a minimum of a ratio of one street tree per twenty feet frontage or greater fraction thereof not subtracting ingress and egress dimensions.

3. The use of structural soil is required in paved sites to provide adequate soil volumes for tree roots under pavements, as per ULDR Section 47-21.13. Structural soil details and specifications can be obtained at [http://www.hort.cornell.edu/uhi/outreach/index.htm#soil](http://www.hort.cornell.edu/uhi/outreach/index.htm#soil) This is to be provided at a minimum of 8’ radii of tree trunks, and is to be consistently illustrated and noted on landscape, site and civil plans.

4. Illustrate the location of overhead utilities and follow FPL Right Tree Right Place guidelines for tree selection and placement.

5. Utilities and site amenities such as walkways, flagpoles, transformers, fire hydrants, sewer and water supply lines, trash enclosures, and similar items located on the site shall not be placed in or under required tree planting areas, as per ULDR Section 47-21.12. Confirm with civil, site and life safety plans that utilities and site amenities are not causing conflicts with proposed landscaping. Where conflicts exist, shift the utility and/or site amenities.

6. Light fixtures with an overall height of more than ten feet shall be located a minimum of 15 feet away from shade trees, as per ULDR Section 47-21.12.

7. The zoning of this property requires at least one tree for each 1,000 square feet of net lot area or portion thereof, as per ULDR 47-21.13.A&B. This tree planting requirement is in addition to the VUA landscaping requirements. Twenty percent of the trees shall be shade trees. Please illustrate the calculations and planting on plan.

8. The zoning of this property requires at least twelve ornamental shrubs for each 1,000 square feet of net lot area or portion thereof, as per ULDR 47-21.13.A&B. Shrub planting requirements are in addition to the VUA requirements. At least 50 percent of all required shrubs shall consist of native species. Please illustrate the calculations and planting on plan.
9. Fences facing the street are required to be set back a minimum of 3 feet from the property line and must be planted with continuous hedges, shrubs, groundcover, AND trees in that area between property line and fence. These plantings shall be planted between the street and the property line as per ULDR 47-19.5C.
   a. Hedges and shrubs may be 2 feet tall planted 2 feet apart.
   b. Groundcover may be 6 inches tall planted 6 inches apart.
   c. Trees may be standard or flowering at 10 feet tall, or palms at 8 feet clear trunk, planted an average of 1 tree per 20 feet or portion thereof.
   d. Please specifically note and illustrate this on plans.

10. All detached freestanding signs shall be landscaped underneath the sign with a continuous planting and irrigation system, as per ULDR 47-22.E.3.
    a. This area is to be minimum 3 feet deep and extend at least the same length as the longest side of the sign.
    b. Continuous planting is to be mulched and can be hedges and shrubs 2 feet tall planted 2 feet apart. Groundcover may be 6 inches tall planted 6 inches apart.
    c. Irrigation shall be from a permanent water source.
    d. Please clearly note and illustrate all of the above on plan.

11. Provide an existing tree site plan or existing tree site survey illustrating all existing trees and palms, and number each one.

12. Provide a corresponding list, as per ULDR 47-21.15, of these trees/palms including:
    a. tree number for each
    b. botanical name and common name for each
    c. trunk diameter, in inches, at chest height for trees
    d. clear trunk in feet for palms
    e. condition percentage as a number for each
    f. indicate status for all existing trees/palms on site (remain, relocate, remove)

13. For specimen trees, provide ISA Certified Arborist report for specimen trees, as per ULDR 47-21.15. This report is to be on ISA Certified Arborist business letterhead with contact information and ISA Certification number clearly stated. This report would include tree survey with numbered trees, a corresponding table which includes tree number, botanical name and common name, trunk diameter at breast height, clear trunk for palms, condition percentage, etc.; and a written assessment of existing tree characteristics. This information is required to calculate equivalent value mitigation.

14. Dumpster enclosures shall be landscaped as per ULDR 47-19.4. Continuous planting means hedges and shrubs approximately 2 feet tall planted 2 feet apart. This may require existing paving, asphalt and/or concrete to be removed and replaced with planting soil to a minimum depth of 3 feet and the width of the planting area is 3 feet. Please clearly note and illustrate this on plans.

15. In order to improve the appearance of vehicular use areas and to protect and preserve the appearance, character and value of the surrounding neighborhoods, minimum landscape requirements are established for such Vehicular Use Areas. Review ULDR Section 47-21.12 for landscape requirements for vehicular use areas, and illustrate such requirements on plans.
16. Provide, in tabular format, all required versus provided landscape calculations. Review landscape plan requirements for data to be included on plans, as per ULDR Section 47-21.6.

Please consider the following prior to submittal for Building Permit:

17. A separate sub-permit application for Tree Removal & Relocation, and General Landscaping for site are required at time of master permit submittal.

18. Provide separate Plumbing sub permit application for irrigation. Irrigation plans are required at time of Building permit submittal. Plans are to be in compliance with ULDR 47-21.6.A.11 and 47-21.10.

19. Note that tree removal at time of demolition will not be permitted unless the Master Permit for redevelopment has been submitted for review.
Case Number: PRE18005

CASE COMMENTS:
Please provide a response to the following:

1. All exterior glazing should be impact resistant.
2. All entry / exit doors should be solid, impact resistant or metal.
3. All entry and exit doors should be equipped with a secondary locking system like door pins, deadbolts or burglary prevention hardware.
4. A Closed Circuit TV system capable of retrieving an identifiable image of an individual should be utilized focusing on the register areas, entry and exit points, safe, office, bike rack, exterior of business and parking lots.
5. The businesses should be equipped with an intrusion alarm and a silent “Panic” alarm for police response. The alarm system should have battery back-up and or cellular back-up features.
6. The businesses should be equipped with a safe that is bolted to floor.
7. Site lighting and landscaping should follow C.P.T.E.D. standards.

GENERAL COMMENTS

It is highly recommended that the managing company make arrangements for private security during construction.

Please submit responses in writing prior to DRC sign off.
CASE COMMENTS:

1. Submit a traffic impact statement and coordinate with the Transportation and Mobility Department regarding traffic calming and a traffic impact study if needed. Take into consideration that the review of this study, once submitted, will take about 4-6 weeks.

2. Please provide a breakdown of your parking requirement for each use that is being proposed and show how you are meeting this requirement.

3. There must be a minimum of 22 feet from the driveways ultimate right of way line to the first conflict point. Please ensure this requirement is met.

4. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10' measured from intersection point of pavement edges), alleys with alleys (15' measured from intersection point of extended property lines), alleys with streets (15' measured from intersection point of extended property lines), and streets with streets (25' measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35.

5. Show all sidewalk dimensions on the site plan, including all pinch points on the site.

6. Bicycle parking is strongly encouraged, covered if possible, with a bike pump. Consult the APBP Bicycle Parking Guidelines and Broward County End-of-Trip Bicycle Facilities Guide. Provide the minimum long term and short term bicycle parking based on requirements in the guide and include total counts on the site plan data sheet.

7. Please consider enhancing the pedestrian experience by providing interactive public art works, seating, and shade along all sidewalks to promote multimodal travel.

8. Ensure all access points, sidewalks, walkways, and curb cuts are unobstructed and ADA accessible with appropriate slopes and detectible warning devices and indicate on the site plan.

9. Additional comments may be provided upon further review.

10. Signature required.

GENERAL COMMENTS:

Please address comments below where applicable.

1. Contact Benjamin Restrepo at 954-828-5216 or brestrepo@fortlauderdale.gov to set up an appointment for final plan approval.
2. The City’s Transportation & Mobility Department encourages the use of sustainable materials such as permeable pavement and electric car charge stations and installation of multimodal facilities such as bicycle pump stations and bike lockers.

3. Please note that any work within the City’s right-of-way will require an MOT approved by Transportation and Mobility and Engineering for permitting. Any full closures of roadways, alleys, or sidewalks that are over 72 hours will require a Revocable License Agreement (RLA) with the City of Fort Lauderdale.
**CASE COMMENTS:**

Please provide a response to the following:

1. The applicant is strongly encouraged to contact neighbors adjacent to, as well as condominium and neighborhood associations located within three hundred feet (300’) of the development site, to advise of this proposal (a listing of officially-recognized neighborhood associations is provided on the City’s website: http://www.fortlauderdale.gov/neighbors/civic-associations). Please provide acknowledgement and/or documentation of any public outreach.

2. The site is designated Employment Center on the City's Future Land Use Map. The proposed use is permitted in this designation. This is not a determination on consistency with Comprehensive Plan Goals, Objectives and Policies.

3. Verify that copy of plat is the most current recorded plat, including notes and amendments, for the proposed site. Provide documentation from the Broward County Planning Council verifying that the site does not require platting or replatting. If replatting or platting is not required, contact the Development Review Services Section of the Planning and Environmental Regulation Division of Broward County at (954) 357-6637 to ensure that proposed project is consistent with the latest recorded plat restriction.

4. Prior to site plan submittal provide a signed and sealed survey showing all above ground improvements, utilities, rights of way dimensions and all easements. This survey shall be based on a Standard Title Commitment issued by a title insurer licensed to do business in Florida or an Opinion of Title issued by an attorney admitted to the Florida Bar. The title commitment or Opinion of Title must have an effective date no more than thirty days prior to the date of submittal of the survey and must be certified to the City of Fort Lauderdale.

5. Indicate the project’s compliance with the following ULDR, sections by providing a point-by-point narrative response, on letterhead, with date and author indicated.
   - Section, 47-25.2, Adequacy Requirements.

6. Indicate compliance with Section, 47-14.11 List of permitted and conditional uses, Airport Industrial Park (AIP) District.

7. Provide a narrative indicating compliance with the following section: Per Section 47-14.20 - Restaurants are permitted as a principal use in the AIP district, only in conjunction with and lying within development consisting of a minimum of five hundred thousand (500,000) square feet of improved land held under one (1) ownership, provided, however, that the sale or dispensing of preparing food or beverages by the glass for consumption off premises is prohibited. For the purpose of this section, a freestanding restaurant means a restaurant which provides waiter or waitress table side service, printed menus from which selections are made by patrons, and silverware, glassware and chinaware for dining use.

8. Per Section 47-14.11 Permitted accessory uses shall be limited to a maximum of two thousand five hundred (2,500) square feet unless specifically noted. The following are permitted as accessory uses:
   - Coffee Shop
   - Food and Beverage Carry-Out, No Drive-Thru
   - Restaurant
   - Retail

Provide a narrative indicating compliance with the above.
9. It is recommended the following pedestrian and bicycle-related comments be addressed:
   a. Pursuant to ULDR, Section 47-25.2.M.6. Adequacy requirements/Transportation/Pedestrian facilities: Sidewalks, pedestrian crossing and other pedestrian facilities shall be provided to encourage safe and adequate pedestrian movement on-site and along roadways to adjacent properties;
   b. Label all proposed pedestrian access/circulation areas: sidewalks, paths, crosswalks etc. (including width) to/from and within the site;
   c. Site plan design indicates pedestrian/vehicle conflict areas. Accommodate safe pedestrian access, in particular to/from public sidewalks, vehicle parking areas and building entrances;
   d. Provide bicycle parking in visible, well-lit areas as close as possible to pedestrian entryways/doors. In addition where possible, locate bicycle parking facilities in an area that is sheltered/covered; and,
   e. Please email Karen Warfel at kwarfel@fortlauderdale.gov for more information on bicycle parking standards and to obtain a copy of the Association of Pedestrian and Bicycle Professionals [APBP] Bicycle Parking Guidelines and Broward County End-of-Trip Bicycle Facility Guide.

10. Consider employing green building practices throughout the project including, but not limited to charging stations, tankless water heaters, rain collection systems, pervious pavers, bio-swales, Florida Friendly™ plant materials, solar panels and green roofs.

11. At time of site plan submittal, provide a photometric plan that includes adjacent residential zoning and use. Photometric Plan, pursuant to ULDR, Section 47-20.14.E-Lighting fixtures shall be shielded, angled, or both, so that direct or indirect light shall not cause illumination in excess of one-half (½) footcandle onto any residential property or residentially used property surrounding the parking facility, measured at the residential property line.

**GENERAL COMMENTS:**
The following comments are for informational purposes.
Please consider the following prior to submittal for a Development Review Committee Site Plan application:

12. If a temporary construction/sales trailer is needed for this project, provide the details and location of the trailer on a separate site plan, to avoid additional review in the future. Verify details and location with the Building Representative.

13. An additional follow-up coordination meeting may be required to review project changes necessitated by the preliminary review comments. Prior to submitting a site plan application, please schedule an appointment with the project planner, Nicholas Kalargyros via email (NicholasK@fortlauderdale.gov) to review project revisions.

14. Additional comments may be forthcoming at the Development Review Committee meeting.
