DEVELOPMENT REVIEW COMMITTEE (DRC) COMMENT REPORT

MEETING DATE: February 26, 2019

APPLICANT: Ital Luxxe, LLC.

PROJECT NAME: Wave Landing

CASE NUMBER: R19015

REQUEST: Site Plan Level II Review: 10 Multifamily Residential Units

LOCATION: 2806 NE 51st Street

ZONING: Residential Multifamily Mid Rise/ Medium High Density (RMM-25)

LAND USE: Medium-High Density Residential

CASE PLANNER: Yvonne Redding
Case Number: R19015

CASE COMMENTS:
1) Provide the FBC Building Type designation on the plans.

2) Provide plans for a compliant Sprinkler system for the project.

3) Provide provisions for garage safety.

4) Detail the Fire Separation for the units.

GENERAL COMMENTS

The following comments are for informational purposes.

Please consider the following prior to submittal for Final DRC:

1. The Florida Building Code shall apply to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.

2. All projects must consider safeguards during the construction process. Florida Building Code Chapter 33 delineates various safeguards that may apply during the construction phase. All structures associated with the protection of pedestrians will require a separate permit. A licensed professional must sign and seal the plans and specifications.

3. The City of Fort Lauderdale is a participating municipality in the National Flood Insurance Program (NFIP). The requirements specific to the City of Fort Lauderdale can be found in Chapter 14 - FLOODPLAIN MANAGEMENT of the Code of Ordinances and accessed at:

Please consider the following prior to submittal for Building Permit:

1. On January 1st, 2018 the 6th Edition of the Florida Building Code was adopted. All work described in Section 101.2, of the Broward County Administrative portion of the Florida Building Code, will govern the administration and enforcement of the proposed work. Each building and or structure will require a separate permit. The following websites will assist in the design considerations:

General Guidelines Checklist is available upon request.
Case Number: R19015

RIGHT-OF-WAY / EASEMENT DEDICATION(S) REQUIRED PER ULDR SECTION 47-25.2.M.5:

a. Provide 20’ permanent Right-of-Way Easement or dedication on southeast corner of NE 51st Street and NE 28th Avenue intersection per ULDR Section 47-24.5.D.p; show / label delineation in the plans.

b. If applicable provide 10’ x 15’ (min.) Utility Easement dedication for any 4 Inch or larger water meter and/or the first private sanitary sewer manhole located within the proposed development (for City Maintenance access).

CASE COMMENTS:

Prior to final DRC sign-off, please provide updated plans and written response to the following review comments:

1. Meet the City’s Adequacy requirements to services provided to the public (fire service, water, wastewater, stormwater, transportation, etc.), per ULDR Section 47-25.2 of the City’s Code of Ordinances. Assess potential demands and impacts on City services and prepare a design for each that utilizes existing water, wastewater, stormwater, and transportation infrastructure to adequately serve this project. If the adequate infrastructure is not available, prepare a design that extends/expands the connection to the nearest City system to adequately serve this development.

2. Provide a current signed and sealed boundary and topographic survey showing all above ground improvements, utilities, rights of way dimensions and all easements. This survey shall be based on a Standard Title Commitment issued by a title insurer licensed to do business in Florida or an Opinion of Title issued by an attorney admitted to the Florida Bar. The title commitment or Opinion of Title must have an effective date no more than thirty days prior to the date of submittal of the survey and must be certified to the City of Fort Lauderdale. If any encumbrances are found in the property, provide a copy of the recorded documents accordingly (i.e. easements, dedications, agreements, vacations, etc.).

Property lines, NVAL, Right-of-Way, watercourses, easements, structures, and roadway shall be clearly shown, labeled and dimensioned. Provide spot elevations on site, at property corners, along property lines (50’ min. interval), existing roadway crowns and pavement edges adjacent to property as appropriate. Elevations shall be referenced to the North American Vertical Datum of 1988 (NAVD 88).

3. The street at the West side of the property appears to be mislabeled (it is NE 28th Ave). Please make the appropriate corrections are made on survey and development plans.

4. The layout for NE 51 St at the NW comer of the property shown on the plans does not match the actual street layout. Please make the appropriate corrections on survey and development plans.

5. Provide disposition of existing utilities on-site and within the adjacent right of way that maybe impacted by the proposed development. Label information on plans (i.e. utility to remain/ be relocated/ removed). Provide correspondence from utility owner (as applicable) and depict any additional requirements they may have on plan (i.e. easements). Utilities include but are not limited to above and underground water, sewer, drainage, electrical, communications, light/power poles, down guys, fire hydrants, manholes, etc.

6. Proposed structures shall not be constructed within existing or proposed right of way/ easements.
7. Submit a formal Site Plan that features all critical dimensions for the proposed development, such as building setbacks, parking lot access, driveway widths, sidewalk dimensions, and typical roadway travel lane (including any on-street parallel parking) widths for NE 51st Street, NE 28th Avenue and 20’ alley.

8. Provide and label typical roadway cross-sections for the proposed development side of NE 51st Street, NE 28th Avenue and 20’ alley: at driveway access points, at on-street parallel parking lanes, and at landscape swale areas (i.e. between travel lane and sidewalk) as appropriate.

9. Discuss effect of restricting additional access to existing adjacent parking lot on the east side of the property as this will create a dead end condition and make the parking lot non-compliant with ULDR Section 47-20. Discuss if there are any agreements between this site and the site to the east for access to NE 28th Ave.

10. Extensions of walkways on right-of-way adjacent to N.E. 51st Street should be removed.

11. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10’ measured from intersection point of pavement edges), alleys with streets (15’ measured from intersection point of extended property lines), alleys with streets (25’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35. Ensure sight triangles are also depicted on adjacent driveways that would be impacted by proposed improvements on this project. Sight triangles located at the intersection of a local street or driveway with a right-of-way under County, State or Federal jurisdictions, are subject to the sight visibility requirements of those jurisdictions.

12. More prominently show on all plan sheets and typical roadway sections the existing Right-of-Way boundaries adjacent to the proposed development along NE 51st Street, NE 27th Avenue and 20’ alley. Also show proposed Right-of-Way, Right-of-Way Easement, Sidewalk Easement, and existing Alley Reservation boundaries as applicable for this project. Existing and proposed Right-of-Way and/or Easement boundaries must be clearly depicted on site plan, proposed development plans (especially civil) and sections/ elevations.

Building Elevations: Show and label existing Right-of-Way, proposed Right-of-Way and/or Easement boundaries, existing/ proposed utility easements and horizontal building clearances on all building elevation / section details, as appropriate.

13. Discuss dumpster enclosure/ trash pick-up access requirements with case planner and waste management. Clearly depict trash enclosure on site plan. Show truck turning movements in and out the proposed dumpster enclosure/ building as applicable. Per ULDR Section 47-19.4.D.6, all dumpster enclosures and adjacent service access drive shall be placed on poured concrete, solid or perforated interlocking concrete block paving (ICB), or any existing hardened paving system.

14. Continue concrete sidewalk across NE 28th Ave driveway access point per the City’s Driveway Plan Detail Sheets (Right-of-Way), available online at http://www.fortlauderdale.gov/home/showdocument?id=1524 via the City’s website and eliminate curb & gutter to allow for proper drainage into the swale and maintain existing roadway drainage.

15. For surface or ground-level parking lot layout:
a. Show and label total number of parking stalls, dimension areas including drive aisle widths, and typical parking stall width/depth (please refer to applicable ADA standards for the required geometric dimensions of ADA parking spaces).

b. Provide a dimension between the ground level columns to ensure at least 20' width is provided.

c. Per ULDR Section 47-20.11.A, drive aisle width shall be 24' (min.) adjacent to 90-degree angle parking stalls.

d. The minimum clear width and depth parking stall dimensions shall be 8’-8” and 18’-0”, respectively, and shall not be encroached upon by building columns. Please label on plans.

16. Proposed trees shall be installed a min. 6 feet away from adjacent travel lanes when no curb is present.

17. Depict proposed building doors and provide sufficient grades/details on conceptual paving, grading and drainage plans to verify ADA accessibility design for the site, especially ground floor access to the new building, as well as crossing proposed driveways and connecting to existing sidewalks (at intersections and with adjacent property) as appropriate; coordinate proposed site grading and 1st Level Finished Floor Elevations to meet ADA accessibility requirements.

18. Bike racks (if recommended by TAM) shall be located within the proposed development property lines, and outside sight triangles, easements and dedications.

19. Within adjacent City Right-of-Way, staging/storage will not be allowed, construction fence shall not encroach within intersection corner sight triangles, construction fence gates shall not swing into the public Right-of-Way, and any Jib Crane radius shall not extend beyond private property boundaries. Any City Right-of-Way closure over 72 hours requires a Revocable License Agreement, processed by Property Right-Of-Way Committee (DRC) and approved by the City’s Commission, prior to Right-of-Way permit issuance by the Department of Sustainable Development for Maintenance of Traffic.

Prior to submitting Administrative Review (i.e. DRC Level I) application to request Revocable License Agreement, please contact Dennis Girisgen at 954-828-5123 or dgrisgen@fortlauderdale.gov to discuss proposed scope of closure within City Right-of-Way.

20. Discuss if pedestrian lighting is proposed; if not, discuss the possibility of the addition of pedestrian lighting along City Right-of-Way, which requires perpetual maintenance by the Applicant via a Maintenance Agreement executed with the City. Please contact the Case Planner for details to match the area.

21. Provide Maintenance Agreement Area Exhibit, which provides a visual representation of the area within the adjacent public Right-of-Way (adjacent to the proposed development) to be maintained in perpetuity by the developer. Label whether the adjacent Right-of-Way is FDOT, BCHCED, or City jurisdiction, as well as label all proposed improvements, including asphalt and other specialty paving, specialty sidewalks, landscaping, irrigation, lighting, curb and gutter etc. that will be maintained by the Applicant throughout the life of the improvements.

22. Coordinate with Public Works for any connections to and/or demolition of existing City infrastructure. Any new trees (located within or adjacent to City Right-of-Way) should be placed with sufficient horizontal and vertical distances (per City, County, and State guidelines) to/from City’s public infrastructure, including stormwater assets, to allow for continued Public Works maintenance without obstruction. If this cannot be accommodated due to field conditions, then the developer shall relocate the existing City’s public infrastructure to resolve the conflict(s) and to comply with City’s, County’s & State’s engineering standards/permits/policies.

a. For Storm Drainage, Sanitary Sewer, and Water related matters, contact Igor Vassiliev at 954-
b. For City Utility Atlas Maps, GIS, and as-built information, to help accurately plot and label utilities in the vicinity of proposed work, contact Craig Barrett at 954-828-5875 or crbarrett@fortlauderdale.gov. Show existing City utilities and easements (water, sewer, forcemain, and stormwater utilities) in proposed engineering plans (utility demolition, stormwater pollution prevention plan (SWPPP), landscape and civil plans).

c. Provide written correspondence between Public Works and the Engineer of Record.

23. Show and label all existing and proposed utilities (utility type, material and size) on civil and landscaping plans for potential conflict. A min. 5 feet and 10 feet horizontal clearance is required between the edge of City utilities infrastructure (pipes, exfiltration trenches, structures, etc.) and proposed small and large trees, respectively (including proposed water and sewer services to the development). Appropriate root barriers shall be installed per City’s landscaping regulations a min. 1 foot away from the City utility/infrastructure. Any new trees (located within or adjacent to City Right-of-Way) should be placed with sufficient horizontal and vertical distances (per City, County, and State guidelines) to/from City’s public infrastructure, including stormwater assets, to allow for continued Public Works maintenance without obstruction. If this cannot be accommodated due to field conditions, then the developer shall relocate the existing City’s public infrastructure to resolve the conflict(s) and to comply with City’s, County’s & State’s engineering standards/permits/policies. Depict separation is provided on plans and include a note regarding horizontal clearance requirement on the landscape plans.

25. Provide conceptual Water and Sewer Plan that features proposed connections to City infrastructure, including limits of any existing City water main and/or sanitary sewer infrastructure to be removed and/or modified, and location of all existing utilities in vicinity of the proposed improvements (that may be in conflict).

26. Any road cuts for utilities or curb cuts within City Right-of-Way shall be restored to full lane width for 50’ minimum length (by contractor), per City Code of Ordinances Section 25-108; show and label in plans as appropriate. Verify with FDOT and/or BCHCED their requirements for any milling and asphalt pavement restoration in vicinity of proposed road cuts for utilities and/or curb cuts within their respective Right-of-Way jurisdictions.

27. Conceptual Paving, Grading, and Drainage Plan:

a. Provide sufficient existing and proposed grades and information on conceptual Paving, Grading, and Drainage Plan and details to demonstrate how stormwater runoff will remain onsite (include typical cross-sections along all property lines as appropriate, and how the proposed project improvements (i.e. on-street parking, sidewalks, etc.) will not adversely impact the adjacent Right-of-Way, properties and waterways. Show location of building roof drains, and their proposed connection(s) to the on-site drainage system.

b. Drainage mitigation shall be required for any impacts within the adjacent City Right-of-Way such as increased runoff or reduction of existing storage/treatment due to proposed improvements, in accordance with the City of Fort Lauderdale Comprehensive Plan (Ordinance C-15-08), Objective 4.1 under Infrastructure Elements. Applicant shall be responsible for maintenance of these proposed storm drain infrastructure improvements.
located within City Right-of-Way during a 1-year warranty period, until accepted by the City’s Public Works Department.

c. Please note that private stormwater infrastructure (drainage pipes, wells, or basins), Trees, or Permanent Structures (fences, walls, etc) are not permitted in City Right of Way or City drainage easements. Please remove any proposed stormwater systems, trees, or permanent structures that are not in compliance with this requirement or provide appropriate documentation of City Rights-of-Way or easement vacated to allow the construction of private underground utilities.

d. The covered driveway area appears to have flow of runoff to low point in slab without positive drainage. Please clarify if this is the design intent.

28. Provide storm runoff calculations, signed and sealed by a Florida registered professional engineer, which demonstrate how minimum criteria regarding adjacent street crown, water quality and finished floor elevations are met, as well as how the 25-year, 3-day storm event is maintained on site with zero discharge to Right-of-Way and adjacent properties. Please also comply with the City of Fort Lauderdale Comprehensive Plan (Ordinance C-08-18), Objective 4.1 under Infrastructure Elements, and be advised that effective 7/1/2017, all projects must comply with the Broward County ‘Future Conditions Average Wet Season Groundwater Level’ map.

Drainage mitigation is required for any impacts within adjacent City of Fort Lauderdale Right-of-Way, such as increased runoff, additional impervious areas, and reduction of existing storage or treatment (i.e. swale areas). Engineer of Record (EOR) shall evaluate the adjacent City roadway system capacity and demonstrate that the proposed improvements will not negatively impact the City’s existing drainage system, and provide recommendations in compliance with the City’s Comprehensive Plan (i.e. meets or exceeds the 10-year/1-day storm event drainage criteria).

29. Contact the Floodplain Manager, Richard Benton at 954-828-6133 or rbenton@fortlauderdale.gov regarding proposed Finished Floor elevation and fill requirements per City’s Code of Ordinances Chapter 14 – Floodplain Management, including Ordinance C-14-26.

30. Proposed Swales in City ROW handling stormwater runoff in City ROW shall be shown with sufficient grade elevations and transitions details on civil plans to demonstrate that the proposed roadway improvements are not creating drainage puddles in City’s roadways. Civil plans and landscape plans do not show the same swale features. Please review and revise as needed.

31. Evaluate the possibility of utilizing a sustainable stormwater approach with the possibility of low impact (cistems, pervious pavers, bioswales, raingardens, etc.) uses for landscaping along the streetscape.

32. If dewatering activities are anticipated, a notarized City dewatering affidavit shall be filed at City’s building department when submitting a demolition or foundation permit along with any applicable dewatering permit from regulatory agencies such as the South Florida Water Management District or Broward County Department of Environmental Protection.

33. Please add the following (standard City EROSION CONTROL & POLLUTION PREVENTION NOTES):

Pollution Prevention Notes (Applicable to most site developments)

a) Contractor shall adhere to of the National Pollution Discharge Elimination System (NPDES) requirements. The contractor shall institute Best Management Practices (BMPs) to ensure compliance with the NPDES program and to minimize the impact to public stormwater facilities. A Notice of Intent (NOI) shall be filed prior to start construction activities.
b) Prior to demolition activities, contractor shall install pollution prevention control devices (i.e., silt barriers, sediment basins, turbidity barriers around stormwater outfalls on the waterside of lakes, ponds, canals, or waterways, silt screens, etc. according to the approved SWPPP and as recommended by the Florida Department of Environmental Protection (DEP) latest guidelines and permitting requirements.

c) Prior to demolition activities, a silt fence in accordance with the approved SWPPP details and latest DEP standards shall be erected around the site property lines. All public inlets surrounding the site shall be protected by the installation of filter fabric into the frame and grate or other approved BMPs to protect against storm runoff.

d) Pollution control installations, as approved and shown in the SWPPP, shall be maintained throughout demolition and construction periods until the project has been completed and approved by City engineering inspector or project engineer.

e) Contractor shall inspect the pollution control devices daily for signs of malfunction, failure, or needed repairs, and shall make remedial actions immediately upon discovery.

f) Existing stormwater inlets, catch basins, or manholes, onsite and offsite, shall be protected from sediment storm runoff from the proposed demolitions and construction activities.

g) Contractor shall immediately remove all mud, dirt, or other materials tracked or spilled onto existing roads and facilities due to demolition or construction activities from the proposed development.

h) In order to minimize the amount of sediments, mud, and dust transported onto public roadways by the construction vehicles or runoff, the contractor shall install stabilized temporary construction entrance(s) from the construction site as recommended by FDEP. Each temporal construction entrance is a stabilized 6-inch thick layer of 2 to 3 inch Course Aggregate Stone, 12” minimum width, and length to accommodate a minimum of one trucking vehicle.

   i. The entrance shall be maintained periodically as conditions demand in a condition that will prevent tracking or flowing of sediments onto public rights-of-way. Sediment shall be trapped in cleanout areas and properly handled as onsite debris per applicable state regulations.

   ii. When necessary, vehicle wheels shall be cleaned prior to entrance onto public right-of-way.

   iii. All materials spilled, dropped, washed or tracked from vehicles onto roadways or into public storm drains must be removed by the contractor immediately.

   iv. Trucks shall not ‘cut corners’ where the construction exit meets the roadways.

   v. Sweeping of public roadways shall be done periodically as condition demand.

   i) Dust generated from construction shall be minimized by daily watering of the site.

j) Contractor shall provide an erosion and sedimentation control inspector to inspect all points of discharge into nearby waterbodies to record the condition of discharge points, integrity of silt fence and pollution control devices, dust control measures, vehicular traffic and construction material storage and disposal. Written record of all inspections shall be stored by the contractor during demolition and construction periods and shall be submitted to City inspectors upon request.

The inspection report shall include at a minimum the following information:

   i. Name of inspector and his/her qualifications in erosion and sedimentation control
   ii. Date of the inspection
   iii. Rainfall rate
   iv. Observations about the SWPP
   v. Actions taken by contractor for all incidents of noncompliance with permit(s)
   vi. Certification that the facility is in compliance with the SWPP and permit(s)

If dewatering activities are anticipated, a notarized City dewatering affidavit shall be filed at City’s building department when submitting a demolition or foundation permit along with any
applicable dewatering permit from regulatory agencies such as the South Florida Water Management District or Broward County Department of Environmental Protection.

Dewatering Notes *(Applicable if dewatering activities are anticipated)*

a) The applicant shall use Broward County’s latest Plate WM 2.1 - Future Conditions for determining the average wet season ground water levels to evaluate if demolition or excavation/earthwork will require dewatering activities. The Plate WM 2.1 – Future Conditions average wet season ground water levels can be accessed through the following link: http://bcgis.maps.arcgis.com/apps/View/index.html?appid=70c3f3ffca88748c28e432719ece2844c4

b) If dewatering activities are anticipated, a notarized City dewatering affidavit shall be filed at City's building department when submitting a demolition or foundation permit along with any applicable dewatering permit form regulatory agencies such as the South Florida Water Management District or Broward County Department of Environmental Protection.

c) If dewatering is going to be needed, please submit a dewatering plan, so it can be reviewed by the City’s stormwater and environmental groups.

34. Please be advised dewatering activities will not be allowed without an approved dewatering affidavit, SWPPP, and dewatering permit from applicable regulatory agencies.

35. For Engineering General Advisory DRC Information, please visit our website at https://www.fortlauderdale.gov/home/showdocument?id=30249

36. Additional comments may be forthcoming at the DRC meeting and once additional/ revised information is provided on plans.
Case Number: R19015

CASE COMMENTS:
Please provide a response to the following:

1. The City has adopted Florida Friendly Landscaping requirements into our ULDR Section 47-21. This basically means that plant material must be grouped together based on watering needs (hydro zone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Plant material species must be minimum 50% Florida Friendly Landscaping. Planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Illustrate hydro zones on planting plan, and include calculations in table.

2. The use of CU structural soil is required in paved sites to provide adequate soil volumes for tree roots under pavements, as per ULDR Section 47-21.13. CU Structural soil details and specifications can be obtained at http://www.hort.cornell.edu/uhi/outreach/index.htm#soil This is to be provided at a minimum of 8’ radii of tree trunks, and is to be consistently illustrated and noted on landscape, site, and civil plans.

3. The structural soil drain is required when percolation rates are less than 4” vertical clearance per hour. Provide documentation of report used to prove this calculation. The drain and connections are to be illustrated on civil plans.

4. There is a product that the Landscape Department will approve the use of in place of CU Structural soil. With the Structural soil repositioning of the underground utilities is required due to the tree’s root system. The Silva cell product will provide the required root development area for a healthy and vibrant tree, along with their use it will allow the utilities to be in place and not affect their location in conjunction with the tree’s root system. Please look into the use of the Silva cell product for this and all future site developments.

   a. As with the use of CU Structural soil a detail of the product and indication of the extent of use to be provided of the Silva cell product.

5. Please provide an overlay sheet (with site area measurements) demonstrating how the site area calculation requirements are being met and correspond to the site calculation data sheet.

6. Review landscape plan requirements for data to be included on plans, as per ULDR Section 47-21.6.

7. Please visit Sec. 47-21. “Landscape and Tree Preservation Requirements” for site landscape requirements.

   a. Please correct Required as to Provided site and landscape requirements.

8. Landscape areas to be protected from vehicle encroachment as such with curbing.

9. Vehicle overhangs do not count toward minimum landscape area requirements.

   a. Demonstrate how the landscape will be protected at head of parking stalls.
10. A 25 feet sight triangle is required at the intersection of two streets, measured from the intersection point of extended property lines at a street and a street. This area must be clear of obstructions between 2.5 feet and 8 feet above elevation of adjoining pavement, per ULDR 47-2.2.Q.3 and ULDR 47-35. Illustrate and label this triangle on landscape plan, and confirm landscaping is installed outside of sight triangles.

a. Please increase the overall height of the street trees in the sight triangles at NE 27 AVE to a minimum 8 feet of canopy clearance. Trees require a minimum of 60 percent canopy to a 40 percent trunk height ratio; please adjust the size of the street tree accordingly.

b. Indicate overall tree height and canopy clearance of street trees in plant list.

11. A minimum separation of 6 feet is required between the tree trunk and travel lane when curb and gutter DO NOT exist, and a minimum separation of 4 feet is required between the tree trunk and travel lane when curb and gutter DO exist. Illustrate this clearance.

12. Fences facing the street and those that are required to be set back a minimum of 3 feet from the property line are to be planted with continuous hedges, shrubs, and groundcover in this area between property line and fence. This planting shall consist of varied species, and shall be planted between the street and the property line as per ULDR 47-19.5C.

a. Hedges and shrubs may be 2 feet tall planted 2 feet apart.

b. Groundcover may be 6 inches tall planted 6 inches apart.

c. Please clearly note and illustrate this on plans.

d. With the new proposed sidewalk adjacent to the existing trees.

e. Please demonstrate the impact the sidewalk will have on the existing trees.

f. Please demonstrate how the sidewalk will be constructed without damage to the trees including the root system.

g. Please have a certified ISA Arborist provide a report of prescribed actions to follow to protect the trees for any canopy and or root pruning to be done.

h. Verify if possible to use an alternative design such as curving the sidewalk into the property and or an alternative to concrete paving such as a poured porous aggregate.

13. Please demonstrate the impact on the existing street trees with the request of the offsite parking.

a. Please demonstrate how the offsite parking will be constructed without damage to the trees including the root system.

b. Please have a certified ISA Arborist provide a report of prescribed actions to follow to protect the trees and any canopy and or root pruning to be done.
14. Due to the loss of additional shade trees along NE 51 ST for the parking.
   
   a. Please propose shade trees on the property side of the sidewalk in these areas.

15. Utilities and site amenities such as walkways, flagpoles, transformers, fire hydrants, sewer and water supply lines, trash enclosures, and similar items located on the site shall not be placed adjacent to, in, or under required tree planting areas, as per ULDR Section 47-21.12. Confirm with civil, site and life safety plans that utilities and site amenities are not causing conflicts with proposed landscaping. Where conflicts exist, shift the utility and/or site amenities.

16. Light fixtures with an overall height of more than ten feet shall be located a minimum of 15 feet away from shade trees, as per ULDR Section 47-21.12.

17. Provide tree protection barricade detail for existing trees on site to remain, as per ULDR 47-21.15. This barricade must be installed prior to the beginning of proposed work, and a landscape job-check inspection may be scheduled.

18. For trees proposed for removal, please have a certified ISA Arborist provide condition ratings for the mitigation purposes.

GENERAL COMMENTS

The following comments are for informational purposes.

Please consider the following prior to submittal for Building Permit:

1. A separate sub-permit application for Tree Removal, Relocation, and General Landscaping for site is required at time of master permit submittal. These are Landscape and Tree permit application documents different than the Broward County standard applications. Please note this at time of submittal.

2. Proposed landscaping work in the City's right of way requires engineering permit and approval (G-Landscape permit). This approval requires documents to be submitted for Engineering review. Note that Landscape will not approve permit review without these Engineering documents being submitted.

3. Provide separate Plumbing sub permit application for irrigation. Irrigation plans are required at time of Building permit submittal. Plans are to be in compliance with ULDR 47-21.6.A.11 and 47-21.10. Note that planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Plant material must be grouped together based on watering needs (hydrozone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Illustrate hydrozones on planting plan, and include calculations in table.
Case Number: R19015
Wave Landing

CASE COMMENTS:
Please provide a response to the following:

1. All doors should be impact, metal, or solid core. Secondary locks should be provided along with an 180 degree view finder on solid doors.
2. Consider pre-wiring residential units for alarm systems.
3. Consider options of how to control the pool area from unwanted activity/persons.
4. Pool area should incorporate safety features to prevent unsupervised children from accessing the pool.
5. Will vehicle entry area be gated?

Noted on plans: The building’s security is provided by appropriate locking devices, adequate lighting as well as total site visibility within CPTED requirements. The entire site will be lighted during the evening hours. The building does not have hidden dark areas; there is full visibility to all areas of the site. The building will be fully secured from the exterior. Fencing.

General Comments

The following comments are for informational purposes.

Please consider the following prior to submittal for Final DRC:

1.

Please consider the following prior to submittal for Building Permit:

1.
Case Number: R19015

CASE COMMENTS:
Please provide a response to the following:

1. Garbage, Recycling and Bulk Trash shall be provided.

2. Recycling reduces the amount of trash your business creates and it is the best way to reduce monthly waste disposal costs and improve your company’s bottom line.

3. Solid Waste Services shall be provided by a Private Contractor licensed by the City.

4. Service Days shall be: No restriction for Commercial collection. Service may not occur earlier than 7:00 am or later than 10:00 pm within 250 feet of residential.

5. Solid Waste charges shall be included in monthly maintenance fee as prescribed in owner’s association documents (Multi-family).

6. Service Days shall be per the City’s residential routing schedule.

7. Solid Waste Collection shall be on private property container shall not be placed, stored or block the public street to perform service (large multifamily and commercial parcels).

8. Provide on the site plan a garbage truck turning radii for City review. Indicate how truck will circulate within property.

9. Submit a Solid Waste Management Plan on your letterhead containing name of project, address, DRC case number, number of units if applicable, and indicate whether it is Pre or Final DRC.
   
   o This letter is to be approved and signed off by the Sustainability Division, and should be attached to your drawings. Please email an electronic copy to smccutcheon@fortlauderdale.gov. Letter should include an analysis of the expected amounts of solid waste and recyclables that will be generated (if different from current capacity), and container requirements to meet proposed capacity.
   o Community Inspections will reference this Solid Waste Plan for sanitation compliance issues at this location.

GENERAL COMMENTS

The following comments are for informational purposes.
Please consider the following prior to submittal for Final DRC:

1. None
Case Number: R19015

CASE COMMENTS:

1. Is the existing parking lot being used to fulfill parking requirements for residential or commercial uses in the area? Please provide documentation supporting the existing scenario.

2. The property to the east of this site with the surface parking lot will require an exit driveway on to NE 51st St to mitigate the loss of access on to NE 28th Ave.

3. Please provide parallel on street parking along Ne 51st St where possible to mitigate some of the loss parking from the existing parking lot.

4. City reserves the right to meter on street parking in the public right of way at any time.

5. Please provide pedestrian lighting along the sidewalks abutting your property.

6. Please shrink the driveway width to 20 feet wide.

7. Are the existing speed humps on NE 51st St being proposed to remain or to be removed?

8. All 90 degree back out parking is required to of 24 feet in width to back out.

9. All loading and unloading must be contained on site including postal delivery services and rideshare pick up and drop off.

10. Show all sidewalk and parking dimensions on the site plan, including all pinch points on the site.

11. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10’ measured from intersection point of pavement edges), alleys with alleys (15’ measured from intersection point of extended property lines), alleys with streets (15’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35.

12. Bicycle parking is strongly recommended. Consult the APBP Bicycle Parking Guidelines, city of Fort Lauderdale Parking Standards and Broward County End-of-Trip Bicycle Facilities Guide. Provide the minimum long term and short term bicycle parking based on requirements in the guide and include total counts on the site plan data sheet.

13. Ensure all access points, sidewalks, walkways, and curb cuts are unobstructed and ADA accessible with appropriate slopes and detectible warning devices and indicate on the site plan.

14. Additional comments may be provided upon further review.

15. Signature required.
GENERAL COMMENTS:
Please address comments below where applicable.

1. Contact Benjamin Restrepo at 954-828-5216 or brestrepo@fortlauderdale.gov to set up an appointment for final plan approval.

2. The City’s Transportation & Mobility Department encourages the use of sustainable materials such as permeable pavement and electric car charge stations and installation of multimodal facilities such as bicycle pump stations and bike lockers.

3. Please note that any work within the City’s right-of-way will require an MOT approved by Transportation and Mobility and Engineering for permitting. Any full closures of roadways, alleys, or sidewalks that are over 72 hours will require a Revocable License Agreement (RLA) with the City of Fort Lauderdale.
Case Number: R19015

CASE COMMENTS:
Please provide a response to the following:

1) The applicant is strongly encouraged to contact neighbors adjacent to, as well as condominium and neighborhood associations located within three hundred feet (300’) of the development site, to advise of this proposal (a listing of officially-recognized associations is provided on the City’s website: www.fortlauderdale.gov/neighbors/civic-associations and a map of neighborhood associations may be found at: http://gis.fortlauderdale.gov). Please provide acknowledgement and/or documentation of any public outreach.

2) The site is designated Medium-High Residential on the City’s Future Land Use Map. The proposed use is permitted in this designation. This is not a determination on consistency with Comprehensive Plan Goals, Objectives and Policies.

3) Provide address verification form for the file. Contact Devon Anderson, 954-828-5233, if one has not yet been provided for the project site.

4) Verify that copy of plat is the most current recorded plat, including notes and amendments, for the proposed site. Provide documentation from the Broward County Planning Council verifying that the site does not require platting or replatting. If replatting or platting is not required, contact the Development Review Services Section of the Planning and Environmental Regulation Division of Broward County at (954) 357-6637 to ensure that proposed project is consistent with the latest recorded plat restriction.

5) Provide information regarding any existing parking agreements and/or cross access agreements for the site. Provide evidence that the owner of the parking lot to the east is aware that once this project is developed there will be non-conforming issues with the parking lot. The Broward County Property Appraiser website has the owner listed as: Dickerson, Rachel, Donald and Perdue, J.T.

6) Provide the following changes on site plan:
   a. Provide correct project name throughout the plan sheets and narrative.
   b. Indicate all adjacent building footprints, indicating their uses and heights, and dimension approximate setbacks.
   c. Dimension widths of balconies and any other proposed architectural features.
   d. Provide dimension to center line of right-of-way.
   e. Dimension widths of walkways.
   f. Provide dimension to asphalt and wheel stops and dumpster enclosure.
   g. Please revise the site data table to reflect the correct parking requirement.
   h. Provide location and dimension of proposed pool equipment.
   i. Delineate pedestrian crossing at entrance drive.
   j. Indicate all utilities (both above and below ground) that would affect the proposed planting or landscape plan. Overhead lines (if any) should be placed underground. If the lines cannot be placed underground, provide documentation from Florida Power & Light Company indicating such.

7) Provide the following changes on elevations:
   a. Vary and articulate the building massing in order to improve the public realm and pedestrian experience.
b. Consider reconfiguring wood veneer cladding to a rectangular form and removing cladding from the center portion of the project in order to provide an appearance of three separate buildings.

c. Show setback dimensions from the property lines to all architectural elements on the elevation pages. Architectural features such as eaves, cornices, unenclosed balconies with open railings, window sills, awnings, chimneys, bay windows, and dormers accessory to a residential use are permitted to extend into a yard area a maximum distance of three (3) feet from the face of the building, or one-third (⅓) of the required yard, whichever is less.

8) Provide note on roof plans that the roof area is not designed for human occupancy and shall only be used to service and maintain mechanical equipment.

9) Provide accurate context plan which shows the dumpster location and wheel stops along the south portion of the project.

10) Applicant will be required to pay a Park Impact Fee for the proposed residential units prior to issuance of building permit in accordance with ULDR Sec. 47-38A, Park Impact Fees.

11) This project is subject to the requirements of Broward County Public School Concurrency. The applicant will notify the School Board Superintendent or designee of this proposal. Prior to submitting an application for placement on a Planning and Zoning Board or City Commission agenda, a written response from the School Board shall be provided by the applicant. Prior to application for final DRC approval, please provide confirmation from the School District that the residential development is exempt or vested from the requirements of public school concurrency, or a School Capacity Availability Determination (SCAD) letter that confirms that capacity is available, or if capacity is not available, that mitigation requirements have been satisfied.

**General Comments**

The following comments are for informational purposes.

Please consider the following prior to submittal for Final DRC:

12) If a temporary construction/sales trailer is needed for this project, provide the details and location of the trailer on a separate site plan, to avoid additional review in the future. Verify details and location with the Building Representative.

13) An additional follow-up coordination meeting may be required to review project changes necessitated by the DRC comments. Prior to routing your plans for Pre-PZ and/or Final DRC sign-off, please schedule an appointment with the project planner (call 954-828-6495) to review project revisions and/or to obtain a signature routing stamp. Please note applicant is responsible for obtaining signatures from all discipline members that had comments and may need to resolve comments through individual appointments if necessary.
