DEVELOPMENT REVIEW COMMITTEE (DRC) COMMENT REPORT

MEETING DATE: June 25, 2019

APPLICANT: Initech Properties, LLC.

PROJECT NAME: Tarpon Lofts

CASE NUMBER: R19034

REQUEST: Site Plan Level III Review: Waterway Use, 9-Unit Multi-Family Residential Development in Downtown Regional Activity Center

LOCATION: 400 SE 9th Court

ZONING: Regional Activity Center - Residential and Professional Office District (RAC-RPO)

LAND USE: Downtown Regional Activity Center (D-RAC)

CASE PLANNER: Randall Robinson
Case Number: R19034

DEDICATION OF RIGHTS-OF-WAY: Per ULDR Section 47-25.2.M.5, property shall be conveyed to the public by plat, deed or grant of easement as needed in accordance with the Broward County Trafficways Plan, the city's comprehensive plan, subdivision regulations and accepted applicable traffic engineering standards:

a. Provide 10’ x 15’ (min.) permanent Utility Easement for any 4 Inch or larger water meter and/or the first private sanitary sewer manhole located within the proposed development (for City Maintenance access); show / label delineation in the plans as appropriate.

CASE COMMENTS:

Prior to Planning and Zoning Board Meeting sign-off, please provide updated plans and written response to the following review comments:

1. Meet the City’s Adequacy requirements to services provided to the public (fire service, water, wastewater, stormwater, transportation, etc.), per ULDR Section 47-25.2 of the City’s Code of Ordinances. Assess potential demands and impacts on City services and prepare a design for each that utilizes existing water, wastewater, stormwater, and transportation infrastructure to adequately serve this project. If the adequate infrastructure is not available, prepare a design that extends/ expands the connection to the nearest City system to adequately serve this development.
   a. Prepare service demand calculations for water & wastewater services and obtain a letter of service availability from the City’s Public Works - Engineering Department. Submit water and wastewater capacity availability request form and documents/plans at https://www.fortlauderdale.gov/departments/sustainable-development/urban-design-and-planning/development-applications-boards-and-committees/development-review-committee-service-dem...

2. The portion of S.E. 4th Avenue adjacent to property as proposed will require a Right-of-way Vacation. Vacation of any platted Utility Easement or right of way would require a separate DRC submittal, DRC staff support, and City Commission approval.

3. Half of the right-of-way Vacation will have to go to the adjacent property. Provide written authorization/concurrence from adjacent property owner located immediately west, that allows this proposed development to request to vacate the entire right-of-way width located between the two properties.

4. Please be advised that additional Easements may need to be dedicated to the City resulting from the Vacation of Rights-Of-Way approval process, including Utility Easement(s) that allow the City perpetual maintenance access to existing public sewer, storm drain, and water infrastructure, and Access Easement(s).

As applicable, provide documents such as easement and/or right-of-way deed, joinders, consents and Attorney’s Opinion of Title. Please refer to City’s Web site:

5. Discuss if existing 10' Easement along North property boundary is a public easement. If so, contact the City's Public Works Department to confirm the location of any public utilities (i.e. storm drain, sewer, and water) within the Utility Easement, and obtain a 'letter of no objection' for construction located within their Utility Easement. Otherwise, a 'letter of no objection' from each private utility owner that has an interest in this Utility Easement will also be required.

6. Provide disposition of existing utilities on-site and within the adjacent right of way that maybe impacted by the proposed development. Label information on plans (i.e. utility to remain/ be relocated/ removed). Provide correspondence from utility owner (as applicable) and depict any additional requirements they may have on plan (i.e. easements). Utilities include but are not limited to above and underground water, sewer, drainage, electrical, communications, light/power poles, down guys, fire hydrants, manholes, etc.

7. Proposed required on-site improvements (i.e. building, foundation, back flow preventer, fdc, clean out, doors, etc.) shall not be constructed within existing or proposed right of way/ dedications/ easements.

8. Clearly indicate on plans the limits of construction and how the proposed improvements will transition into the existing (on-site and off-site) as applicable.

9. Depict/ label existing/ proposed stop sign/ bar on right of way adjacent to the site and on driveway connections to right of way as applicable.

10. Provide disposition of existing light poles, fire hydrants, and any other utilities within the adjacent right of way that maybe impacted by the proposed development especially existing Power Lines along SE 9th Court and SE 4th Avenue that encroach within the proposed development.

11. Per ULDR Section 47-19.3 (Seawall Ordinance): the top of seawall for redeveloped property shall be between elevation 3.9 feet NAVD88 (minimum height) and FEMA base flood elevation for the property (maximum height) except as described under ULDR Section 47-19.3.f; allowance for fixed docks to extend 10 inches above the adjacent seawall; allowance for floating docks and requirement that they be permitted and permanently attached.

12. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10’ measured from intersection point of pavement edges), alleys with alleys (15’ measured from intersection point of extended property lines), alleys with streets (15’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35. Ensure sight triangles are also depicted on adjacent driveways that would be impacted by proposed improvements on this project. Sight triangles located at the intersection of a local street or driveway with a right-of-way under County, State or Federal jurisdictions, are subject to the sight visibility requirements of those jurisdictions.

13. More prominently show on all plan sheets and typical roadway sections the existing Right-of-Way boundaries adjacent to the proposed development along SE 9th Ct.; also show proposed Right-of-Way, Right-of-Way Easement, Sidewalk Easement, and existing boundaries as applicable for this project. Existing and proposed Right-of-Way and/or Easement boundaries must be clearly depicted on site plan, proposed development plans (especially civil) and sections/ elevations.
Building Elevations: Show and label existing Right-of-Way, proposed Right-of-Way and/or Easement boundaries, existing/ proposed utility easements and horizontal building clearances on all building elevation / section details, as appropriate.

14. Discuss dumpster enclosure/ trash pick-up access requirements with case planner and waste management. Clearly depict trash enclosure on site plan. Show truck turning movements in and out the proposed dumpster enclosure/ building as applicable. Ensure sufficient height clearance is provided within garage for truck access. Per ULDR Section 47-19.4.D.6, all dumpster enclosures and adjacent service access drive shall be placed on poured concrete, solid or perforated interlocking concrete block paving (ICB), or any existing hardened paving system. Per ULDR Section 47-19.4.D.7, dumpsters serving restaurants require grease traps, oil / sand separators, and drains connecting to sanitary sewer.

15. For surface or ground-level parking lot layout:
   a. Show and label total number of parking stalls, dimension areas including drive aisle widths, and typical parking stall width/depth.
   b. Per ULDR Section 47-20.11.A, drive aisle width shall be 24’ (min.) adjacent to 90-degree angle parking stalls, 18’ (min.) adjacent to 60-degree angled parking stalls, 13’ (min.) adjacent to 45-degree angled parking stalls, and 12’ (min.) adjacent to 30-degree angled parking stalls. Reconfigure parking stalls shown at end of drive aisle, to eliminate 180 degree back-out maneuver.
   c. The minimum clear width and depth parking stall dimensions shall be 8’-8” and 18’-0”, respectively, and shall not be encroached upon by building columns.
   d. The minimum clear width and depth of parallel parking shall be 8’-8” and 24’-0”, respectively.

16. Depict proposed building doors and provide sufficient grades/details on conceptual paving, grading and drainage plans to verify ADA accessibility design for the site, especially ground floor access to the new building, as well as crossing proposed driveways and connecting to existing sidewalks (at intersections and with adjacent property) as appropriate; coordinate proposed site grading and 1st Level Finished Floor Elevations to meet ADA accessibility requirements.

17. Within adjacent City Right-of-Way, staging/storage will not be allowed, construction fence shall not encroach within intersection corner sight triangles, construction fence gates shall not swing into the public Right-of-Way, and any Jib Crane radius shall not extend beyond private property boundaries. Any City Right-of-Way closure over 72 hours requires a Revocable License Agreement, processed by Property Right-Of-Way Committee (DRC) and approved by the City’s Commission, prior to Right-of-Way permit issuance by the Department of Sustainable Development for Maintenance of Traffic.

Prior to submitting Administrative Review (i.e. DRC Level I) application to request Revocable License Agreement, please contact Dennis Girisgen at 954-828-5123 or dgrisgen@fortlauderdale.gov to discuss proposed scope of closure within City Right-of-Way.

18. Discuss if pedestrian lighting is proposed; if not, discuss the possibility of the addition of pedestrian lighting along City Right-of-Way, which requires perpetual maintenance by the Applicant via a Maintenance Agreement executed with the City. Please contact the Case Planner for details to match the area.

19. Provide Maintenance Agreement Area Exhibit, which provides a visual representation of the area within the adjacent public Right-of-Way (adjacent to the proposed development) to be maintained in perpetuity by the developer. Label whether the adjacent Right-of-Way is FDOT, BCHCED, or City jurisdiction, as well as label all proposed improvements, including asphalt and other specialty paving, specialty sidewalks, landscaping, irrigation, lighting, curb and gutter etc. that will be maintained by
the Applicant throughout the life of the improvements. Perpetual maintenance of newly constructed exfiltration trenches, inlets, etc. within adjacent City Right-of-Way will typically revert back to the City, upon successful inspection/acceptance by Public Works after 1-year warranty period.

20. Please email CRBARRETT@FORTLAUDERDALE.GOV to obtain copies of the City utility maps as applicable to the project location and show existing City utilities and easements (water, sewer, forcemain, and stormwater utilities) in proposed engineering plans (utility demolition, stormwater pollution prevention plan (SWPPP), and civil plans).

21. Any road cuts for utilities or curb cuts within City Right-of-Way shall be restored to full lane width for 50’ minimum length (by contractor), per City Code of Ordinances Section 25-108; show and label in plans as appropriate.

22. The proposed utility easements would not be permitted with gated access. Further, any private utilities, trees, or permanent structures would not be permitted within the proposed utility easement.

23. Conceptual Paving, Grading, and Drainage Plan
   a. Please clarify on the plans where the retention volumes are derived from.
   b. Discuss the purpose of the proposed 12-inch CPP storm piping without exfiltration.

24. If dewatering activities are anticipated, a notarized City dewatering affidavit shall be filed at City’s building department when submitting a demolition or foundation permit along with any applicable dewatering permit form regulatory agencies such as the South Florida Water Management District or Broward County Department of Environmental Protection.

25. Contact the Floodplain Manager, Richard Benton at 954-828-6133 or rbenton@fortlauderdale.gov regarding proposed Finished Floor elevation and fill requirements per City’s Code of Ordinances Chapter 14 – Floodplain Management, including Ordinance C-14-26.

26. Show and label all existing and proposed utilities (utility type, material and size) on civil and landscaping plans for potential conflict. A min. 5 feet and 10 feet horizontal clearance horizontal separation is required between city utilities infrastructure and proposed small and large trees, respectively (including proposed water and sewer services to the development). Any new trees (located within or adjacent to City Right-of-Way) should be placed with sufficient horizontal and vertical distances (per City, County, and State guidelines) to / from City’s public infrastructure, including stormwater assets, to allow for continued Public Works maintenance without obstruction. If this cannot be accommodated due to field conditions, then the developer shall relocate the existing City’s public infrastructure to resolve the conflict(s) and to comply with City’s, County’s & State’s engineering standards/permits/policies. Ensure separation is provided and include a note regarding horizontal clearance requirement on the landscape plans.

27. Discuss how surface runoff from the proposed development between the building and Right-of-Way boundaries will be mitigated such that it won’t be conveyed into the adjacent properties. Current layout would result in property to the east being negatively impacted.

28. Evaluate the possibility of utilizing a sustainable stormwater approach with the possibility of low impact (cisterns, pervious pavers, bioswales, raingardens, etc.) uses for landscaping along the streetscape.

29. Please provide (or revise if already submitted) an erosion, sedimentation, and stormwater pollution prevention plan (SWPPP) showing the adjacent City’s existing stormwater system. A copy of the approved SWPP shall be at the construction site from the date of demolition initiation to the date of final construction activities.

30. For Engineering General Advisory DRC Information, please visit our website at https://www.fortlauderdale.gov/home/showdocument?id=30249
31. Additional comments may be forthcoming at the DRC meeting and once additional/ revised information is provided on plans.
Case Number: R19040

CASE COMMENTS:

Please provide a response to the following:

1. The City has adopted Florida Friendly Landscaping requirements into our ULDR Section 47-21. This basically means that plant material must be grouped together based on watering needs (hydro zone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Plant material species must be minimum 50% Florida Friendly Landscaping. Planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Illustrate hydro zones on planting plan and include calculations in table.

2. Within the Downtown RAC district and as per Chapter 4 of the Downtown Master Plan Design Guidelines newly planted shade tree street trees are suggested to be a minimum of 20-22 feet tall; 10-12 feet spread with 6 feet canopy clearance and provided on 30 feet centers within the curb. When overhead utilities or site conflicts exist, required street trees may be small maturing trees provided on 20 feet centers. Small maturing trees require a minimum 6 feet canopy clearance and a canopy (60%) to trunk (40%) minimum ratio.
   a. Smaller medium size maturing shade trees such as Pigeon Plum require only 6 feet horizontal clearance from the structure. Please shift the west palm cluster westward to the actual corner and provide a medium size shade tree in the palm’s original location. The cluster of palms proposed in front of the evaluator will remain due to the limited horizontal clearance between the palms and structure.

3. A minimum separation of 6 feet is required between the tree trunk and travel lane when curb and gutter DO NOT exist, and a minimum separation of 4 feet is required between the tree trunk and travel lane when curb and gutter DO exist. Illustrate this clearance.
   a. This is regarding the medium size street tree in comment No.2.

4. Review landscape plan requirements for data to be included on plans, as per ULDR Section 47-21.6.
   a. Please provide the botanical name of plant materials along with common name.

5. Tree and Plant species included on the Florida Exotic Pest Plant Council’s Invasive Plant Species List as amended, shall not be planted as required or optional landscaping, and invasive plant species listed shall be removed from the site. Example; Sword fern – Nephrolepis, is on the FEPPC list as category 1 invasive.

6. Cordia tree listed on plant list and counted towards site requirements, yet is not shown as with a proposed location on the landscape plan.

7. Illustrate and label the horizontal clearance from tree trunk to edge of utility on the landscape plan. Landscaping must provide a minimum horizontal clearance of 5 feet for small trees and palms, and a minimum of 10 feet for large trees and palms from underground utilities. Provide a cross section detail to illustrate this clearance. Please show underground utilities on landscape plan.
   a. Please show any underground utilities on landscape plan with a description of what they are.
8. Utilities and site amenities such as walkways, flagpoles, transformers, fire hydrants, sewer and water supply lines, trash enclosures, and similar items located on the site shall not be placed adjacent to, in, or under required tree planting areas, as per ULDR Section 47-21.12. Confirm with civil, site and life safety plans that utilities and site amenities are not causing conflicts with proposed landscaping. Where conflicts exist, shift the utility and/or site amenities.

9. Light fixtures with an overall height of more than ten feet shall be located a minimum of 15 feet away from shade trees, as per ULDR Section 47-21.12.
   a. Please investigate the use of light poles at a height of 10 feet. Horizontal clearance between trees and light poles of 10 feet height may be reduced.
   b. Would it be possible for decorative up lighting of the trees? Decorative up lighting may assist in the security of the site.

10. For proposed work in and around existing Mangroves, Broward County must be contacted for permission and permits to proceed. Contact Linda Sunderland at Broward County Environmental Protection and Growth Management Department, Environmental Licensing and Building Permitting Division at (954) 519-1454 or LSUNDERLAND@broward.org. Provide documentation illustrating such communication and requirements.
    a. Prior to any work taken place with the Mangrove trees, please verify with the City of Fort Lauderdale Landscape Department once license has been obtained from the County.
    b. Please take into value of these Mangrove trees not only what they do for the ecosystem but aesthetically as well. While the Landscape Department agrees that there is much biomass in this location and it does block the view of the waterway. Some of the biomass is of different species of plant material other than Mangrove trees. Once the area at the Mangrove trees is cleaned, possible re-evaluation may take place as to any Mangrove trees to be removed. It may also be possible that the Mangrove trees not be removed yet pruning will provide the desired vistas.
    c. These Mangrove trees may also be now and in the future screen unwanted views for those who will be paying to reside here.

11. Relocated trees will be moved by the applicant following the ANSI A 300 standards and guaranteed by the permit holder for one year for trees of less than six inches in caliper and for two years for trees greater than six inches in caliper, as per ULDR 47-21.15. A tree protection barricade before during and after construction activities may be required to ensure protection of tree or trees.
    a. While a separate permit is required for tree removal and tree relocation, no permit is required to prepare the trees for relocation. Please have a certified ISA Arborist propose what actions are required for a successful relocation of the trees. The sooner the trees are prepared the greater a successful relocation will occur.

**GENERAL COMMENTS**

The following comments are for informational purposes.

**Please consider the following prior to submittal for Building Permit:**

1. A separate sub-permit application for Tree Removal, Relocation, and General Landscaping for site is required at time of master permit submittal. These are Landscape and Tree permit application documents different than the Broward County standard applications. Please not this at time of submittal.
2. Provide separate Plumbing sub permit application for irrigation. Irrigation plans are required at time of Building permit submittal. Plans are to be in compliance with ULDR 47-21.6.A.11 and 47-21.10. Note that planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Plant material must be grouped together based on watering needs (hydrozone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Illustrate hydrozones on planting plan and include calculations in table.
**Case Number: R19034**

**CASE COMMENTS:**
Please provide a response to the following:

1. All doors should be impact, metal, or solid core. Secondary locks should be provided along with an 180 degree view finder on solid doors.
2. All stairwells should egress only first floor.
3. Consider pre-wiring residential units for alarm systems.
4. It is noted there will be gated areas, will this include the parking garage entry/exit points?

Noted: We have an aluminum fence surrounding the property so we can secure the property for nighttime after hours with a series of gates controlled either a combination lock or key fob system. The front door will have a callbox fitted with a camera so residents can buzz guests in.

**GENERAL COMMENTS**

The following comments are for informational purposes.

Please consider the following prior to submittal for Final DRC:

1.

Please consider the following prior to submittal for Building Permit:

1.
Case Number: R19034

CASE COMMENTS:

Please provide a response to the following:

1. Garbage, Recycling and Bulk Trash shall be provided.

2. Recycling reduces the amount of trash your business creates and it is the best way to reduce monthly waste disposal costs and improve your company’s bottom line.

3. Solid Waste Services shall be provided by a Private Contractor licensed by the City.

4. Service Days shall be: No restriction for Commercial collection. Service may not occur earlier than 7:00 am or later than 10:00 pm within 250 feet of residential.

5. Solid Waste Collection shall be on private property container shall not be placed, stored or block the public street to perform service (large multifamily and commercial parcels).

6. Containers must comply with 47-19.4

7. Dumpster enclosure: concrete pad, decorative block wall, gates hung independently, protective bollards, secondary pedestrian side entry, high strengthen apron and driveway approach, night light, hot water, hose bib, drain, low circulating ventilation for dampness, weep holes, landscaping, smooth surface walkway to accommodate wheeled containers.

8. Provide on the site plan a garbage truck turning radii for City review. Indicate how truck will circulate within property.

9. Submit a Solid Waste Management Plan on your letterhead containing name of project, address, DRC case number, number of units if applicable, and indicate whether it is Pre or Final DRC.
   - This letter is to be approved and signed off by the Sustainability Division, and should be attached to your drawings. Please email an electronic copy to smccutcheon@fortlauderdale.gov. Letter should include an analysis of the expected amounts of solid waste and recyclables that will be generated (if different from current capacity), and container requirements to meet proposed capacity.
   - Community Inspections will reference this Solid Waste Plan for sanitation compliance issues at this location.

General Comments

The following comments are for informational purposes.
Please consider the following prior to submittal for Final DRC:

1. Draw equipment on the site plan.
Case Number: R19034

CASE COMMENTS:

1. All off street parking requirements must be met on site. The proposed on street parking spaces on SE 4th Ave in the public right of way cannot count towards the onsite parking requirement. Residential building in a regional activity center may apply for a parking reduction.

2. Is a parking reduction being requested? If so schedule a meeting to set up a parking methodology for the parking reduction request.

3. The city reserves the right to meter the on street parking stalls in the public right of way at any time.

4. Remove the proposed sliding gate that would cut off access from SE 4th Ave leading to the waterway.

5. Ensure the proposed sidewalks are a minimum of 7 feet wide. This minimum is in reference to clear, unobstructed pathways - Light poles, trees and landscaping is not to be included in this zone. Landscaping should be between the sidewalks and back of curb and a minimum of 4 feet in width.

6. Please show inbound and outbound stacking requirements from the property line to the first conflict point according to sec 47-20.5 General design of parking facilities for each driveway.

7. All elevation changes must begin within the property line and not within public right of way or public access easements.

8. All loading and unloading must be contained on site including postal delivery services and rideshare pick up and drop off.

9. Back of sidewalk should begin on the ultimate right of way/easement dedication line.

10. Show all sidewalk and parking dimensions on the site plan, including all pinch points on the site.

11. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10' measured from intersection point of pavement edges), alleys with alleys (15’ measured from intersection point of extended property lines), alleys with streets (15’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35.

12. Bicycle parking is strongly recommended. Consult the APBP Bicycle Parking Guidelines, city of Fort Lauderdale Parking Standards and Broward County End-of-Trip Bicycle Facilities Guide. Provide the minimum long term and short term bicycle parking based on requirements in the guide and include total counts on the site plan data sheet.

13. Ensure all access points, sidewalks, walkways, and curb cuts are unobstructed and ADA accessible with appropriate slopes and detectible warning devices and indicate on the site plan.
14. Additional comments may be provided upon further review.

15. Signature required.

**GENERAL COMMENTS:**
Please address comments below where applicable.

1. Contact Benjamin Restrepo at 954-828-5216 or brestrepo@fortlauderdale.gov to set up an appointment for final plan approval.

2. The City’s Transportation & Mobility Department encourages the use of sustainable materials such as permeable pavement and electric car charge stations and installation of multimodal facilities such as bicycle pump stations and bike lockers.

3. Please note that any work within the City’s right-of-way will require an MOT approved by Transportation and Mobility and Engineering for permitting. Any full closures of roadways, alleys, or sidewalks that are over 72 hours will require a Revocable License Agreement (RLA) with the City of Fort Lauderdale.
CASE COMMENTS:
Please provide a response to the following:

GENERAL COMMENTS

1. Pursuant to Public Participation requirements of the Unified Land Development Regulations (ULDR) Section 47-27.4.A.2.c., prior to submittal of the application to the Planning and Zoning Board (PZB), a notice from the applicant via letter or e-mail shall be provided to official city-recognized civic organization(s) within 300 feet of the proposed project, notifying of the date, time and place of applicant’s project presentation meeting to take place prior to the PZB meeting.

The applicant shall then conduct a public participation meeting(s) a minimum of 30 days prior to the PZB. The date and location of the meeting is at the discretion of the applicant. Once the meeting(s) is conducted, the applicant shall provide a written report letter to the Department of Sustainable Development, with copy to subject association(s), documenting the date(s), time(s), location(s), number of participants, presentation material and general summary of the discussion after the public participation meeting(s). The report letter shall summarize the substance of comments expressed during the process and shall be made a part of the administrative case file record.

Accordingly, a minimum of ten (10) days prior to the PZB meeting, the applicant shall execute and submit an affidavit of proof of public notice to the Department. If the applicant fails to submit the affidavit, the public hearing will be postponed until the next available hearing date after the affidavit has been supplied.

2. The site is designated Downtown Regional Activity Center (D-RAC) on the City's Future Land Use Map. The proposed use is permitted in this designation. This is not a determination on consistency with Comprehensive Plan Goals, Objectives and Policies.

3. Verify that copy of plat is the most current recorded plat, including notes and amendments, for the proposed site. Provide documentation from the Broward County Planning Council verifying that the site does not require platting or replatting. If replatting or platting is not required, contact the Development Review Services Section of the Planning and Environmental Regulation Division of Broward County at (954) 357-6637 to ensure that proposed project is consistent with the latest recorded plat restriction.

4. Please contact Thuy (Twee) Turner, AICP, Broward County Planning and Development Division ttturner@broward.org or 954-357-6623 to ensure the proposed plat note language meets their standards before moving forward. Please provide staff with written response from the County.

5. The proposed project requires review and approval by the PZB. A separate application and fee is required for PZB submittal, and the applicant is responsible for all public notice requirements (Section 47-27). In addition, the development permit shall not take effect nor shall a building permit be issued until thirty (30) days after approval, and then only if no motion is adopted by the City Commission seeking to review the application. Note: The City Clerk's office requires 48 hours' notice prior to Commission meeting if a computer presentation is planned (i.e. PowerPoint), to be provided on CD or flash drive and a copy submitted to the City Clerk, contact the project planner for more information.
6. Development applications requesting residential dwelling units in the D-RAC are subject to unit availability at the time of DRC approval, and remaining available units will be allocated at the time of site plan approval on a first come, first served basis. In the event RAC units are not available, an applicant may request flex units or in the event there are insufficient number of RAC units to allocate to an entire project, the unit allocation may be divided between RAC units and flex units. Staff will advise the applicant on the status of unit allocation during the Development Review Committee (DRC) approval process.

7. As this application requests dwelling units in the D-RAC, the proposed project requires a 30-day request for review period by the City Commission. A separate submittal and application is required for City Commission 30-day request for review and, should the Commission call up the application, the applicant is responsible for all public notice requirements (Section 47-27). Note: The City Clerk's office requires 48 hours' notice prior to a Commission meeting if a computer presentation is planned i.e. Power Point, to be provided on CD or flash drive and a copy submitted to the City Clerk, contact the project planner for more information (954-828-5265). Please note units will be allocated to pending projects based on order of project approval.

8. In accordance with ULDR Section 47-25.2.P,

A. A phase 1 archaeological survey of the subject property should be conducted prior to any ground disturbance activity within the property. The purpose of survey will be to locate and identify and archaeological deposits located within the subject property and to determine the effect of the proposed development upon any extant archaeological features and resources. A. The survey should be performed by professional archaeologist who meets the Secretary of the Interior's Professional Standards for such work as set forth in 36 CFR part 61 as amended. The survey should conform Chapter 267 (Florida Statutes) and the State's professional Standards per Rule 1A-46, Florida Administrative Code. Additional information regarding the survey standards may be found in Module 3 (Guidelines for Historic Preservation Professionals) of the Florida Division of Historical Resources Cultural Resources Management Standards and Operational Manual.

B. The survey shall consist of a two (2) north/south transects evenly distributed across the subject property; each transect shall consist of at least three (3) shovel test even distributed or placed judgmentally as allowed by site conditions. Test shall conform to the State Standards.

C. The archaeologist shall prepare an archaeological survey report, including survey methods, findings, and recommendations. The report shall be submitted to the City Historic Preservation Planner and Case Planner for final approval. Contact Trisha Logan, City Planner III / Historic Preservation Board Liaison at 954-828-7101 or tlogan@fortlauderdale.gov.

In the event that significant archaeological materials or unmarked human remains are encountered then the archaeologist shall be empowered to direct the project site manager to halt excavation in the vicinity of the find and to alert the City's historic preservation staff to coordinate the discovery and take measures to implement Chapter 872.05 Florida Statutes as it pertains to the discovery of unmarked human remains.
9. All projects in the D-RAC are subject to the Design Guidelines of the Downtown Master Plan. Please submit project for Design Review Team (DRT) Review. Application may be found here https://www.fortlauderdale.gov/home/showdocument?id=920

10. Indicate the project’s compliance with ULDR Section 47-23.8, Waterway Use, by providing a point-by-point narrative response, on letterhead, with date and author indicated.

11. Provide table of contents for narratives.

12. Provide the following changes on site plan/elevations:
   a. As underground utilities exist in the r.o.w. of SE 4th Avenue proposed to be vacated, confirm that the sliding gate may be placed over the utilities;
   b. Provide pilasters at both sides of gate to signal to visitors that they are passing from public to private property. Pilasters may also be a good location for signage indicating hours of public use, rules for public use as well as a possible name for the waterfront pocket park proposed;
   c. Provide articulation on elevator tower;
   d. Selectively integrate existing mangroves into site plan;
   e. Provide a more sculptural, unique and more expansive bench at water such that two separate parties may feel comfortable using bench at same time;
   f. The proposed site plan will serve as a template for subsequent redevelopment on uniquely narrow, alley-like SE 9th Court. Within the limited r.o.w. width, shade trees, rather than sidewalks are deemed more essential to pedestrian comfort. Therefore, the street tree pattern should, as closely as possible, match the pattern of shade trees 30 feet on center with groupings of single small/medium palms at street corners. See Landscape comments for more information; and,
   g. Label elevations to show direction of north, south, east and west.

13. Discuss all newly proposed seawalls, any repair to existing seawalls and/or re-location of existing seawalls with Engineering Design Manager.

14. If application proposes dockage, provide an approval letter from the Broward County Environmental Protection Department, contact Julie Krawczyk (954-519-1266), prior to P2B submittal. Docks and other mooring devices are subject to a separate review and approval process through the Building Department.

15. It is recommended the following pedestrian and bicycle-related comments be addressed:
   a. Provide bicycle parking for visitors in visible, well-lit areas as close as possible to pedestrian entryways/doors. In addition where possible, locate bicycle parking facilities in an area that is sheltered/covered;
   b. Provide bicycle storage lockers for residents, preferably in a room with natural light; and,
   c. Consult the Association of Pedestrian and Bicycle Professionals (“APBP”) for Bicycle Parking Guidelines and Broward County End-of-Trip Bicycle Facilities Guide at http://www.apbp.org/. For more information on bicycle parking standards, please email Ben Restrepo at brestrepo@fortlauderdale.gov.

16. Provide roof plan for all structures indicating the location of all mechanical equipment. This plan shall include spot elevations of the parapet wall and roof as well as mechanical equipment to verify adequate screening and to illustrate how equipment will be screened or shielded from view.
addition, indicate all mechanical equipment within the subject site on the site plan and elevations where applicable. Discuss the use of the roof as an accessible amenity.

17. The City’s Vision is to support sustainable infrastructure. Consider employing green building practices throughout the project such as, but not limited to; charging stations, tank-less water heaters, rain collection systems, pervious pavement where appropriate, bio-swales, Florida Friendly™ plant materials, solar panels and green roofs. For instance, consider a green sustainable roof, as part of this site plan. Green roofs help to conserve energy, improve air quality and may provide an extra amenity space.

18. Provide legible photometric plan for the entire site. Extend values on photometric plans to all property lines. Show values pursuant to ULDR, Section 47-25.3.A.3.a and 47-20.14. Indicate lighting poles on site plan and landscape plan, and provide detail with dimensions. Garage internal lighting fixtures and glare cannot be visible from neighboring properties.

19. Applicant will be required to pay a Park Impact Fee for the proposed residential units prior to issuance of building permit in accordance with ULDR, Section 47-38A, Park Impact Fees. An impact fee calculator can be found at: [http://www.fortlauderdale.gov/departments/sustainable-development/building-services/permit-fees/park-impact-fee-calculator](http://www.fortlauderdale.gov/departments/sustainable-development/building-services/permit-fees/park-impact-fee-calculator)

20. This project is subject to the requirements of the Downtown RAC Education Mitigation Agreement. The applicant will notify the School Board Superintendent or designee of the proposed project and provide the City with a written response from the School Board prior to Final Development Review Committee (Final DRC) approval. Provide a School Capacity Availability Determination (SCAD) letter that confirms that capacity is available, or if capacity is not available, that mitigation requirements will be satisfied.

**GENERAL COMMENTS**

The following comments are for informational purposes. Please consider the following prior to submittal for Final DRC:

21. All construction activity must comply with Section 24-11, Construction sites. Contact Joe Pasquariello, Structural Plans Examiner (954-828-5419) to obtain his signature on the final DRC plans.

22. Additional follow-up coordination meeting may be required to review project changes necessitated by the DRC comments. Prior to routing your plans for Final DRC sign-off, please schedule an appointment with the project planner (954-828-5265) to review project revisions and/or to obtain a signature routing stamp.

23. Provide a written response to all DRC comments within 180 days.

Please consider the following prior to submittal for Building Permit:

24. If a temporary construction/sales trailer is needed for this project, provide the details and location of the trailer on an additional site plan, to avoid additional review in the future. Ensure details and location receives approval from the Building Services Division’s DRC Representative.
