MEETING DATE: July 9, 2019

APPLICANT: Davie 1, LLC

PROJECT NAME: Davie 1

CASE NUMBER: R19046

REQUEST: Site Plan Level III Review: Conditional Use for a Mixed-Use Development in Community Business (CB) District with 48 Residential Flex Units and 3,000 Square Feet Retail Use, and 12 Residential Units in Residential Multifamily Mid Rise / Medium High Density (RMM-25) District

LOCATION: 3801 Davie Boulevard

ZONING: Community Business (CB) and Residential Multifamily Mid Rise / Medium High Density (RMM-25)

LAND USE: Commercial and Medium High Residential

CASE PLANNER: Adam Schnell
Case Number: R19046

CASE COMMENTS:

1) Provide the FBC Building Type designation on the plans.

2) Indicate Code compliant Sprinkler System.

3) Provide Provisions for Fair Housing per FBC ADA.

4) Designate components of Accessible Routes per FBC ADA Requirements.

5) Designate FBC 406.5/ 406.6 provisions for Air Circulation Requirements for in Building Parking; Also Show Rated Walls, Self-Closing Doors, etc.

GENERAL COMMENTS

The following comments are for informational purposes.

Please consider the following prior to submittal for Final DRC:

1. The Florida Building Code shall apply to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.

2. All projects must consider safeguards during the construction process. Florida Building Code Chapter 33 delineates various safeguards that may apply during the construction phase. All structures associated with the protection of pedestrians will require a separate permit. A licensed professional must sign and seal the plans and specifications.

3. The City of Fort Lauderdale is a participating municipality in the National Flood Insurance Program (NFIP). The requirements specific to the City of Fort Lauderdale can be found in Chapter 14 - FLOODPLAIN MANAGEMENT of the Code of Ordinances and accessed at:

Please consider the following prior to submittal for Building Permit:

1. On January 1st, 2018 the 6th Edition of the Florida Building Code was adopted. All work described in Section 101.2, of the Broward County Administrative portion of the Florida Building Code, will govern the administration and enforcement of the proposed work. Each building and or structure will require a separate permit. The following websites will assist in the design considerations:

General Guidelines Checklist is available upon request.
Case Number: R19046

DEDICATION OF RIGHTS-OF-WAY: Per ULDR Section 47-25.2.M.5, property shall be conveyed to the public by plat, deed or grant of easement as needed in accordance with the Broward County Trafficways Plan, the city's comprehensive plan, subdivision regulations and accepted applicable traffic engineering standards:

a. Provide 25' corner chord Right-of-Way dedication or permanent Right-of-Way Easement on northeast corner of Davie Blvd. / SW 39th Ave. intersection (coordinate with FDOT) per ULDR Section 47-24.5,D,p; show / label delineation in the plans. Clarify with FDOT if Right-of-Way dedication or Right-of-Way Easement will be required.

b. Provide permanent Sidewalk Easement as appropriate along North side of Davie Blvd. to accommodate portion of pedestrian clear path (coordinate required width with FDOT and TAM) that may be located beyond public Right-of-Way; show / label delineation in the plans.

c. Provide 10' x 15' (min.) permanent Utility Easement for any 4 Inch or larger water meter and/or the first private sanitary sewer manhole located within the proposed development (for City Maintenance access); show / label delineation in the plans as appropriate.

CASE COMMENTS:

Prior to Planning and Zoning Board Meeting, please provide updated plans and written response to the following review comments:

1. Meet the City's Adequacy requirements to services provided to the public (fire service, water, wastewater, stormwater, transportation, etc.), per ULDR Section 47-25.2 of the City's Code of Ordinances. Assess potential demands and impacts on City services and prepare a design for each that utilizes existing water, wastewater, stormwater, and transportation infrastructure to adequately serve this project. If the adequate infrastructure is not available, prepare a design that extends/expands the connection to the nearest City system to adequately serve this development.

   b. For sewer cleanout use City’s Standard Detail 213. The cleanout must be 2.5 feet from the property line in the right-of-way.

2. Provide a current signed and sealed boundary and topographic survey based on a Standard Title Commitment issued by a title insurer licensed to do business in Florida or an Opinion of Title issued by an attorney admitted to the Florida Bar. The title commitment or Opinion of Title must have an effective date no more than thirty days prior to the date of submittal of the survey and must be certified to the City of Fort Lauderdale. If any encumbrances are found in the property, provide a copy of the recorded documents accordingly (i.e. easements, dedications, agreements, vacations, etc.).

Property lines, NVAL, Right-of-Way, watercourses, easements, structures, and roadway shall be clearly shown, labeled and dimensioned. Provide spot elevations on site, at property corners, along property lines (50’ min. interval), existing roadway crowns and pavement edges adjacent to property as appropriate. Elevations shall be referenced to the North American Vertical Datum of 1988 (NAVD 88). Sufficient information must be provided on survey in order to staff to determine proposed development improvements are being coordinated with adjacent right of way and properties.
Please provide boundary survey that is based on Standard Title Commitment or Opinion of Title.

Ensure survey depicts all information requested above as well as any information beyond limits of property that maybe required for coordination between existing and proposed improvements adjacent to the site.

3. Provide disposition of existing utilities on-site and within the adjacent right of way that maybe impacted by the proposed development. Label information on plans (i.e. utility to remain/ be relocated/ removed). Provide correspondence from utility owner (as applicable) and depict any additional requirements they may have on plan (i.e. easements). Utilities include but are not limited to above and underground water, sewer, drainage, electrical, communications, light/power poles, down guys, fire hydrants, manholes, etc.

4. Proposed required on-site improvements (i.e. building terrace, building foundation, building overhang, etc.) shall not be constructed within existing or proposed right of way/ dedications/ easements. If encroachments are proposed, provide correspondence from FDOT indicating the same is allowed.

5. Spot elevations/grades shown in proposed development plans shall be per North American Vertical Datum of 1988 (NAVD 88), instead of National Geodetic Vertical Datum of 1929 (NGVD 29).

6. Clearly indicate on plans the limits of construction and how the proposed improvements will transition into the existing (on-site and off-site) as applicable.

7. Depict/ label existing/ proposed stop sign/ bar on right of way adjacent to the site and on driveway connections to right of way as applicable.

8. Provide disposition of existing utility poles, light poles, fire hydrants, and any other utilities within the adjacent right of way that maybe impacted by the proposed development.

9. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10’ measured from intersection point of pavement edges), alleys with streets (15’ measured from intersection point of extended property lines), alleys with alleys (25’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35. Ensure sight triangles are also depicted on adjacent driveways that would be impacted by proposed improvements on this project. Sight triangles located at the intersection of a local street or driveway with a right-of-way under County, State or Federal jurisdictions, are subject to the sight visibility requirements of those jurisdictions.

10. Confirm if proposed Landscaping located near southwest corner of proposed development violates these criteria.

11. Building Elevations: Show and label existing Right-of-Way, proposed Right-of-Way and/or Easement boundaries, existing/ proposed utility easements and horizontal building clearances on all building elevation / section details, as appropriate.

12. Discuss dumpster enclosure/ trash pick-up access requirements with case planner and waste management. Clearly depict trash enclosure on site plan. Show truck turning movements in and out the proposed dumpster enclosure/ building as applicable. Per ULDR Section 47-19.4.D.6, all dumpster...
enclosures and adjacent service access drive shall be placed on poured concrete, solid or perforated interlocking concrete block paving (ICB), or any existing hardened paving system. Per ULDR Section 47-19.4.D.7, dumpsters serving restaurants require grease traps, oil / sand separators, and drains connecting to sanitary sewer.

13. Parking facility entries and exits must be from or to an improved right-of-way a minimum of 20’ width or an improved right-of-way designated by the city as one-way, per ULDR Section 47-20.5.B.2.

14. Per the City’s Code of Ordinances Section 25-56(c), sidewalks shall be required in connection with the development of vacant property, redevelopment of developed property or construction of improvements on developed property to the extent of twenty-five (25) percent or more of the replacement value of existing improvements; they shall be constructed on all public streets abutting the plot, except as provided in the above section, and such sidewalks shall be constructed to standards established by the City Engineer and located as determined by the City Engineer, generally at the edge of the right-of-way. However, if one or more of the exceptions stated in the above section are found to exist, then the property owner can request a sidewalk waiver by providing justification in a letter to the City.

15. Existing public sidewalks adjacent to proposed development (to remain) must be inspected by Engineer of Record to ensure existing sidewalks meet ADA standards and are in good condition. A signed and sealed assessment must be provided indicating sidewalks were inspected and any sidewalk replacement requirements. Plans shall reflect extent of sidewalk replacement accordingly.

16. Depict existing sidewalk adjacent to the development along Davie Blvd. and SW 12th Place and how proposed sidewalk/ pedestrian path will transition into existing sidewalk.

17. Continue concrete sidewalk across and delineate with FDOT’s ‘Curbed Roadway – Flared Turnouts’ standard detail (Index 515 – Sheet No. 2 of 7) for all proposed driveway access points.

18. Label on Site Plan Data Table the required and proposed type of loading zone(s) required, per ULDR Section 47-20.2 Table 2 and Section 47-20.6; also label location of ADA van-accessible parking stalls. If applicable, show truck turning template circulation (label typical minimum centerline turning radius) entering and exiting the site as required for the proposed development. Tuming geometries and loading zone design shall be in accordance with ULDR Section 47-20.6.

19. Show truck turning template circulation (label typical minimum centerline turning radius) entering and exiting the site serving the loading zones required for the proposed development. Tuming geometries and loading zone design shall be in accordance with ULDR Section 47-20.6.

20. Study possibility of reducing proposed Drive Aisle areas within proposed development as much as practical, especially where not adjacent to 90 degree parking stalls.

21. For surface or ground-level parking lot layout:
   a. Show and label total number of parking stalls, dimension areas including drive aisle widths, and typical parking stall width/depth.
   b. Per ULDR Section 47-20.11.A, drive aisle width shall be 24’ (min.) adjacent to 90-degree angle parking stalls, 18’ (min.) adjacent to 60-degree angled parking stalls, 13’ (min.) adjacent to 45-degree angled parking stalls, and 12’ (min.) adjacent to 30-degree angled parking stalls.
   c. The minimum clear width and depth parking stall dimensions shall be 8’-8” and 18’-0”, respectively.
22. Proposed trees shall be installed a min. 4 feet behind proposed curbs when adjacent to travel lanes and a min. 6 feet away from adjacent travel lanes when no curb is present.

23. Within adjacent City Right-of-Way, staging/storage will not be allowed, construction fence shall not encroach within intersection corner sight triangles, construction fence gates shall not swing into the public Right-of-Way, and any Jib Crane radius shall not extend beyond private property boundaries. Any City Right-of-Way closure over 72 hours requires a Revocable License Agreement, processed by Property Right-Of-Way Committee (DRC) and approved by the City’s Commission, prior to Right-of-Way permit issuance by the Department of Sustainable Development for Maintenance of Traffic.

Prior to submitting Administrative Review (i.e. DRC Level I) application to request Revocable License Agreement, please contact Dennis Girisgen at 954-828-5123 or dgirisgen@fortlauderdale.gov to discuss proposed scope of closure within City Right-of-Way.

24. Discuss if pedestrian lighting is proposed; if not, discuss the possibility of the addition of pedestrian lighting along City Right-of-Way, which requires perpetual maintenance by the Applicant via a Maintenance Agreement executed with the City. Please contact the Case Planner for details to match the area.

25. Provide Maintenance Agreement Area Exhibit, which provides a visual representation of the area within the adjacent public Right-of-Way (adjacent to the proposed development) to be maintained in perpetuity by the developer. Label whether the adjacent Right-of-Way is FDOT, BCHCED, or City jurisdiction, as well as label all proposed improvements, including asphalt and other specialty paving, specialty sidewalks, landscaping, irrigation, lighting, curb and gutter etc. that will be maintained by the Applicant throughout the life of the improvements.

26. Any road cuts for utilities or curb cuts within City Right-of-Way shall be restored to full lane width for 50’ minimum length (by contractor), per City Code of Ordinances Section 25-108; show and label in plans as appropriate. Verify with FDOT and/or BCHCED their requirements for any milling and asphalt pavement restoration in vicinity of proposed road cuts for utilities and/or curb cuts within their respective Right-of-Way jurisdictions.

27. Conceptual Paving, Grading, and Drainage:
   a. Drainage mitigation shall be required for any impacts within the adjacent City Right-of-Way such as increased runoff or reduction of existing storage/treatment due to proposed improvements, in accordance with the City of Fort Lauderdale Comprehensive Plan (Ordinance C-15-08), Objective 4.1 under Infrastructure Elements. Engineer of Record (EOR) shall evaluate the adjacent City roadway system capacity and demonstrate that the proposed improvements will not negatively impact the City’s existing drainage system and provide recommendations in compliance with the City’s Comprehensive Plan (i.e. meets or exceeds the 10-year/1-day storm event drainage criteria). Applicant shall be responsible for maintenance of these proposed storm drain infrastructure improvements located within City Right-of-Way during a 1-year warranty period, until accepted by the City’s Public Works Department. (coordinate as appropriate with the respective FDOT and BCHCED agencies for mitigation of additional runoff within those jurisdictions).
   b. Please note that private stormwater infrastructure (drainage pipes, wells, or basins), Trees, or Permanent Structures (fences, walls, etc) are not permitted in City Right of Way or City drainage easements. Please remove any proposed stormwater systems, trees, or permanent structures that are not in compliance with this requirement or provide appropriate documentation of City Rights-of-Way or easement vacated to allow the construction of private underground utilities.
28. Provide storm runoff calculations, signed and sealed by a Florida registered professional engineer, which demonstrate how minimum criteria regarding adjacent street crown, water quality and finished floor elevations are met, as well as how the 25-year, 3-day storm event is maintained on site with zero discharge to Right-of-Way and adjacent properties (Pre vs. Post analysis will only be allowed in areas that are not flood-prone). Please also comply with the City of Fort Lauderdale Comprehensive Plan (Ordinance C-08-18), Objective 4.1 under Infrastructure Elements, and be advised that effective 7/1/2017, all projects must comply with the Broward County ‘Future Conditions Average Wet Season Groundwater Level’ map.

   a. Convert runoff calculations to NAVD datum.
   b. On-site retention area north berm elevation is shown at 8’ and max stage for 25-year 3-day storm is 8.96’. Please make appropriate correction to the design.
   c. Civil plans do not support a minimum perimeter berm of 9’ indicated in drainage calculations, please make appropriate corrections.

29. If dewatering activities are anticipated, a notarized City dewatering affidavit shall be filed at City’s building department when submitting a demolition or foundation permit along with any applicable dewatering permit form regulatory agencies such as the South Florida Water Management District or Broward County Department of Environmental Protection.

30. Exfiltration Trenches:
   a. Provide a clean out structure at each end of exfiltration trench located within the property.

31. Clarify design intent of site grading in the vicinity of proposed building (i.e. ground level Finished Floor appears to be over 2’ higher than existing ground), especially with regards to fill requirements per City’s Code of Ordinances Chapter 14 – Floodplain Management, including Ordinance C-14-26. Please contact the Floodplain Manager, Richard Benton at 954-828-6133 or rbenton@fortlauderdale.gov.

32. Contact the Floodplain Manager, Richard Benton at 954-828-6133 or rbenton@fortlauderdale.gov regarding proposed Finished Floor elevation and fill requirements per City’s Code of Ordinances Chapter 14 – Floodplain Management, including Ordinance C-14-26. Especially where proposed elevations appear to be over 2’ higher than existing ground. Provide correspondance and depict information on plans accordingly.

33. Show and label all existing and proposed utilities (utility type, material and size) on civil and landscaping plans for potential conflict. A min. 5 feet and 10 feet horizontal clearance horizontal separation is required between city utilities infrastructure and proposed small and large trees, respectively (including proposed water and sewer services to the development). Any new trees (located within or adjacent to City Right-of-Way) should be placed with sufficient horizontal and vertical distances (per City, County, and State guidelines) to / from City’s public infrastructure, including stormwater assets, to allow for continued Public Works maintenance without obstruction. If this cannot be accommodated due to field conditions, then the developer shall relocate the existing City’s public infrastructure to resolve the conflict(s) and to comply with City’s, County’s & State’s engineering standards/permits/policies. Ensure separation is provided and include a note regarding horizontal clearance requirement on the landscape plans.

34. Discuss how surface runoff from the proposed development (between building and Right-of-Way boundaries) will be mitigated such that it won’t be conveyed into the adjacent existing public storm drain infrastructure or waterways, and whether additional infrastructure will be required within City Right-of-Way (coordinate as appropriate with the respective FDOT and BCHCED agencies for mitigation of additional runoff within those jurisdictions). Show location of building roof drains, and their proposed connection(s) to the on-site drainage system.
35. Evaluate the possibility of utilizing a sustainable stormwater approach with the possibility of low impact (cisterns, pervious pavers, bioswales, raingardens, etc.) uses for landscaping along the streetscape.

36. Please provide (or revise if already submitted) an erosion, sedimentation, and stormwater pollution prevention plan (SWPPP) showing the adjacent City’s existing stormwater system. A copy of the approved SWPP shall be at the construction site from the date of demolition initiation to the date of final construction activities. CCTV Notes, Pollution Prevention Notes, and Dewatering Notes to be added to the SWPPP can be found on our website.

37. For Engineering General Advisory DRC Information, please visit our website at https://www.fortlauderdale.gov/home/showdocument?id=30249

38. Additional comments may be forthcoming at the DRC meeting and once additional/ revised information is provided on plans.
Please provide a response to the following:

1. The City has adopted Florida Friendly Landscaping requirements into our ULDR Section 47-21. This basically means that plant material must be grouped together based on watering needs (hydro zone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Plant material species must be minimum 50% Florida Friendly Landscaping. Planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Illustrate hydro zones on planting plan, and include calculations in table.

2. The use of CU structural soil is required in paved sites to provide adequate soil volumes for tree roots under pavements, as per ULDR Section 47-21.13. CU Structural soil details and specifications can be obtained at [http://www.hort.comell.edu/uhi/outreach/index.htm#soil](http://www.hort.comell.edu/uhi/outreach/index.htm#soil) This is to be provided at a minimum of 8’ radii of tree trunks, and is to be consistently illustrated and noted on landscape, site and civil plans.

3. The structural soil drain is required when percolation rates are less than 4” vertical clearance per hour. Provide documentation of report used to prove this calculation. The drain and connections are to be illustrated on civil plans.

4. There is a product that the Landscape Department will approve the use of in place of Structural soil. With the Structural soil repositioning of the underground utilities is required. A suspension modular paving system product will provide the required root development area for a healthy and vibrant tree, along with their use it will allow the utilities to be in place and not affect their location in conjunction with the tree’s root system. Please look into the use of the Green Blue Urban soil cell, Silva cell or like product for this and all future site developments.

As with the use of Structural soil a detail of the product and indication of the extent of use to be provided of the soil cell pavement support systems product.

5. Review landscape plan requirements for data to be included on plans, as per ULDR Section 47-21.6.

6. Vehicle overhangs do not count toward minimum landscape area requirements.

7. Provide, in tabular format, all required versus provided landscape calculations.
   a. For the percentage breakdown of required amount of trees, please provide the amount in numeral form not in percentage.

8. In lieu of tree grates, the City of Fort Lauderdale prefers the use of a cold applied, poured in place tree grate system that is designed to bind a selection of decorative aggregates, which provide a bonded, walkability, attractive and porous surface for tree pit such as ADDAPAVE TP, etc.
   a. Davie BLVD is the jurisdiction of the State and any changes to this right of way property requires the FDOT licensed approval. As there are two existing palm trees with tree grates within the sidewalk, please investigate additional trees be proposed along the Davie BLVD.
sidewalk. The city prefers large shade tree species such as the Live Oak that they may provide a greater shade canopy for the public realm.

b. Davie BLVD plans show an existing storm water inlet – where does the underground component of this system run? This may have an impact as to the species of shade tree and their location for installation along Davie BLVD.

c. Due to sidewalk width requirements for SW 39th AVE there may be conflicts as to what may or may not be able for proposal. Please verify size requirement of sidewalk and the landscape area between the sidewalk and street.

d. Additional comments may be forthcoming with the Developer due to site restraints and FDOT requirements.

9. A minimum separation of 6 feet is required between the tree trunk and travel lane when curb and gutter DO NOT exist, and a minimum separation of 4 feet is required between the tree trunk and travel lane when curb and gutter DO exist. Illustrate this clearance.

10. Illustrate and label the horizontal clearance from tree trunk to edge of utility on the landscape plan. Landscaping must provide a minimum horizontal clearance of 5 feet for small trees and palms, and a minimum of 10 feet for large trees and palms from underground utilities. Provide a cross section detail to illustrate this clearance.

   a. SW 12th PL it appears to have an existing 6-inch water main in the right of way swale 6 feet in from the edge of the street. A usable street tree would be palm trees such as Ptychosperma elegans (Solitaire palm). There appears to be enough room for the palm trees to be a minimum 3 feet from the edge of the travel lane with a root barrier 1 foot from the edge of the utility. Please propose clusters of single cane palms of at least 3 canes per cluster of staggered heights with the shortest cane being of 8 feet clear trunk. Each Palm cluster may count toward 20 feet of frontage along SW 12th PL.

11. Minimum tree island width is 8 feet Section 47-21.12.A.4.a.ii. That minimum 8 feet width is the landscape area and doesn’t include the curbing. Section 47-21.9.G.2. Each tree shall have pervious area surrounding it sufficient to support the species, as determined by the department. The minimum planting area shall be for: 1. Shade species with a minimum caliper of three (3) inches, two hundred twenty-five (225) square feet with fifteen (15) feet being the smallest dimension. 2. Shade species with a minimum caliper of two (2) inches, ninety (90) square feet with eight (8) feet being the smallest dimension. Please verify landscape width of tree islands they appear to be undersize.

12. Please follow FPL’s right tree right place for proposing trees adjacent to overhead power lines.

   a. Currently there is no overhead power lines located along SW 12th PL, please investigate putting the overheads located underground that the trees proposed on the north side of the site may be of a large shade species.

   b. Large shade trees like Live Oak require a minimum 30 feet lateral from overhead power lines. Please show overheads that are on SW 39th AVE, there could be a conflict with the proposed Live Oak at the corner and Davie BLVD.
13. Please have a certified ISA Arborist provide the information as to the existing trees including the condition ratings in percentage form that will be required for mitigation purposes. Please have ISA Arborist evaluate mitigate for those to be removed by search of the City of Fort Lauderdale Landscape Department’s web page for [https://www.fortlauderdale.gov/departments/sustainable-development/building-services/landscaping-forms-and-info](https://www.fortlauderdale.gov/departments/sustainable-development/building-services/landscaping-forms-and-info)

14. Perimeter landscape area.
   a. Along the perimeter of a parcel of land which abuts a street, exclusive of vehicular access points, a perimeter landscape area shall be provided. The depth of the perimeter landscape area shall be a minimum of five (5) feet, a maximum of twenty-eight (28) feet, and an average of ten (10) feet. The ten (10) feet of perimeter landscape area closest to the VUA may be counted as part of the twenty percent (20%) minimum VUA landscape requirement.

   *SW 12th PL and SW 39th AVE do not appear to provide this requirement.

15. Utilities and site amenities such as walkways, flagpoles, transformers, fire hydrants, sewer and water supply lines, trash enclosures, light poles and similar items located on the site shall not be placed adjacent to, in, or under required tree planting areas, as per ULDR Section 47-21.12. Confirm with civil, site and life safety plans that utilities and site amenities are not causing conflicts with proposed landscaping. Where conflicts exist, shift the utility and/or site amenities.
   a. Please demonstrate all above, below ground utilities and other amenities on landscape plan.

16. Light fixtures with an overall height of more than ten feet shall be located a minimum of 15 feet aware from shade trees, as per ULDR Section 47-21.12.
   a. Light poles at 10 feet height or less may be located within 15 feet of shade trees.

17. Provide tree protection barricade detail for existing trees on site to remain, as per ULDR 47-21.15. This barricade must be installed prior to the beginning of proposed work, and a landscape job-check inspection may be scheduled.

**GENERAL COMMENTS**

The following comments are for informational purposes.

Please consider the following prior to submittal for Building Permit:

1. A separate sub-permit application for Tree Removal, Relocation, and General Landscaping for site is required at time of master permit submittal. These are Landscape and Tree permit application documents different than the Broward County standard applications. Please note this at time of submittal.

2. Proposed landscaping work in the City’s right of way requires engineering permit and approval (GLandscape permit). This approval requires documents to be submitted for Engineering review. Note that Landscape will not approve permit review without these Engineering documents being submitted.

3. Provide separate Plumbing sub permit application for irrigation. Irrigation plans are required at time of Building permit submittal. Plans are to be in compliance with ULDR 47-21.6.A.11 and 47-21.10. Note
that planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Plant material must be grouped together based on watering needs (hydrozone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Illustrate hydrozones on planting plan, and include calculations in table.

4. Approval from jurisdiction for landscape installation in Right Of Way, preferred prior to final DRC sign off. If jurisdiction approval is obtained after DRC final sign off and the plans require any change, Administrative Review will be required prior to permit review.
Case Number: R19046

CASE COMMENTS:
Please provide a response to the following:

1. The residential lobby should be access controlled and provide a video call box for visitors.
2. Elevators should be access controlled if lobby is not locked.
3. All stairwells should egress only first floor.
4. All doors should be impact, metal, or solid core. Secondary locks should be provided along with an
   180 degree view finder on solid doors.
5. Consider pre-wiring retail spaces/office areas for an alarm system.
6. Consider implementing the use of CCTV to cover entrance/exit in lobby area, all stairwells, and
   elevators.

GENERAL COMMENTS

The following comments are for informational purposes.
Please consider the following prior to submittal for Final DRC:

1. Please consider the following prior to submittal for Building Permit:
   1.
Case Number: R19046
CASE COMMENTS:
Please provide a response to the following:

1. Garbage, Recycling and Bulk Trash shall be provided.

2. Recycling reduces the amount of trash your business creates and it is the best way to reduce monthly waste disposal costs and improve your company's bottom line.

3. Solid Waste Services shall be provided by a Private Contractor licensed by the City.

4. Service Days shall be: No restriction for Commercial collection. Service may not occur earlier than 7:00 am or later than 10:00 pm within 250 feet of residential.

5. Solid Waste charges shall be included in monthly maintenance fee as prescribed in owner's association documents (Multi-family).

6. Solid Waste Collection shall be on private property container shall not be placed, stored or block the public street to perform service (large multifamily and commercial parcels).

7. Containers must comply with 47-19.4

8. Dumpster enclosure: concrete pad, decorative block wall, gates hung independently, protective bollards, secondary pedestrian side entry, high strengthen apron and driveway approach, night light, hot water, hose bib, drain, low circulating ventilation for dampness, weep holes, landscaping, smooth surface walkway to accommodate wheeled containers.

9. Provide on the site plan a garbage truck turning radii for City review. Indicate how truck will circulate within property.

10. Submit a Solid Waste Management Plan on your letterhead containing name of project, address, DRC case number, number of units if applicable, and indicate whether it is Pre or Final DRC.
   
   o This letter is to be approved and signed off by the Sustainability Division, and should be attached to your drawings. Please email an electronic copy to smccutcheon@fortlauderdale.gov. Letter should include an analysis of the expected amounts of solid waste and recyclables that will be generated (if different from current capacity), and container requirements to meet proposed capacity.
   
   o Community Inspections will reference this Solid Waste Plan for sanitation compliance issues at this location.

GENERAL COMMENTS

The following comments are for informational purposes. Please consider the following prior to submittal for Final DRC:

1. None
CASE COMMENTS:

1. Submit a traffic impact statement and coordinate with the Transportation and Mobility Department regarding traffic calming and a traffic impact study if needed. If a traffic study is needed Pursuant to 47-25.2.M.4. Applicant must fund City’s review by consultant and pay a $4,000 deposit prior to scheduling a methodology meeting after which the study will be prepared, transmitted and reviewed by the City’s consultant. Staff and consultant’s review concerns shall be adequately resolved prior to gaining authorization for either the Planning & Zoning Board or City Commission hearings. Take into consideration that the review of this study, once submitted, will take about 4-6 weeks once all documents are received.

2. Ensure sidewalk is a minimum of 6 feet wide on Davie Blvd. This minimum is in reference to clear, unobstructed pathways – Light poles, trees and landscaping is not to be included in this zone. Landscaping should be between the sidewalks and back of curb and a minimum of 4 feet in width.

3. Ensure sidewalk is a minimum of 5 feet wide on SW 39th Ave, SW 12th Pl. This minimum is in reference to clear, unobstructed pathways – Light poles, trees and landscaping is not to be included in this zone. Landscaping should be between the sidewalks and back of curb and a minimum of 4 feet in width.

4. Back of sidewalk should begin on the ultimate right of way/easement dedication line.

5. All loading and unloading must be contained on site including postal delivery services and rideshare pick up and drop off.

6. Please show inbound and outbound stacking requirements from the property line to the first conflict point according to sec 47-20.5 General design of parking facilities for each driveway. The proposed dumpster location may be in conflict with the stacking requirements.

7. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10’ measured from intersection point of pavement edges), alleys with alleys (15’ measured from intersection point of extended property lines), alleys with streets (15’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35.

8. Bicycle parking is needed. Consult the APBP Bicycle Parking Guidelines, city of Fort Lauderdale Parking Standards and Broward County End-of-Trip Bicycle Facilities Guide. Provide the minimum long term and short term bicycle parking based on requirements in the guide and include total counts on the site plan data sheet.

9. Ensure all access points, sidewalks, walkways, and curb cuts are unobstructed and ADA accessible with appropriate slopes and detectible warning devices and indicate on the site plan.

10. Additional comments may be provided upon further review.
11. Signature required.

**GENERAL COMMENTS:**
Please address comments below where applicable.

1. Contact Benjamin Restrepo at 954-828-5216 or brestrepo@fortlauderdale.gov to set up an appointment for final plan approval.

2. The City’s Transportation & Mobility Department encourages the use of sustainable materials such as permeable pavement and electric car charge stations and installation of multimodal facilities such as bicycle pump stations and bike lockers.

3. Please note that any work within the City’s right-of-way will require an MOT approved by Transportation and Mobility and Engineering for permitting. Any full closures of roadways, alleys, or sidewalks that are over 72 hours will require a Revocable License Agreement (RLA) with the City of Fort Lauderdale.
CASE COMMENTS:
Please provide a response to the following:

1) The applicant is strongly encouraged to contact neighbors adjacent to, as well as condominium and neighborhood associations located within three hundred feet (300’) of the development site, to advise of this proposal (a listing of officially-recognized associations is provided on the City’s website: www.fortlauderdale.gov/neighbors/civic-associations and a map of neighborhood associations may be found at: http://gis.fortlauderdale.gov). Please provide acknowledgement and/or documentation of any public outreach.

2) The site is designated Commercial and Medium-High on the City’s Future Land Use Map. The proposed use is permitted in this designation. This is not a determination on consistency with Comprehensive Plan Goals, Objectives and Policies.

3) The proposed project requires review and approval by the Planning and Zoning Board. A separate application and fee are required for PZ Board submittal, and the applicant is responsible for all public notice requirements (Sec. 47-27). In addition, the development permit shall not take effect nor shall a building permit be issued until thirty (30) days after approval, and then only if no motion is adopted by the City Commission seeking to review the application.

4) This application is subject to Unified Land Development Regulations (ULDR) Section 47-27.4.A.2.c, Public Participation requirements. Prior to submittal of the application to the Planning and Zoning Board (PZB), a notice from the applicant via letter or e-mail shall be provided to official city-recognized civic organization(s) within 300 feet of the proposed project, notifying of the date, time and place of applicant’s project presentation meeting to take place prior to the PZB meeting.

The applicant shall then conduct a public participation meeting(s) a minimum of 30 days prior to the PZB. This date and location of the meeting is at the discretion of the applicant. Once the meeting(s) is/are conducted, the applicant shall provide a written report letter to the Department of Sustainable Development, with copy to subject association(s), documenting the date(s), time(s), location(s), number of participants, presentation material and general summary of the discussion after a public participation meeting(s). The report letter shall summarize the substance of comments expressed during the process and shall be made a part of the administrative case file record.

The applicant shall, 10 days prior to the PZB, execute and submit to the department an affidavit of proof of public notice according to this section. If the applicant fails to submit the affidavit, the public hearing will be postponed until the next available hearing date after the affidavit has been supplied.

5) Verify that copy of plat is the most current recorded plat, including notes and amendments, for the proposed site. Provide documentation from the Broward County Planning Council verifying that the site does not require platting or replatting. If replatting or plating is not required, contact the Development Review Services Section of the Planning and Environmental Regulation Division of Broward County at (954) 357-6637 to ensure that proposed project is consistent with the latest recorded plat restriction.

6) Please contact the Broward County Planning and Development Management Division, at PDMinfo@broward.org or 954-357-8695, to ensure the proposed plat note language meets their standards before moving forward. Please provide staff with written response from the County.

7) This project is subject to the requirements of Broward County Public School Concurrency. The applicant will notify the School Board Superintendent or designee of this proposal. Prior to submitting an application
for placement on a Planning and Zoning Board or City Commission agenda, a written response from the
School Board shall be provided by the applicant. Prior to application for final DRC approval, please
provide confirmation from the School District that the residential development is exempt or vested from
the requirements of public school concurrency, or a School Capacity Availability Determination (SCAD)
letter that confirms that capacity is available, or if capacity is not available, that mitigation requirements
have been satisfied.

8) Pursuant to Sec. 47-28.K, proposal requires allocation of flexibility units. Verify the number of units are
available by contacting Jim Hetzel of the Urban Design & and Planning Office, at
JHetzel@fortlauderdale.gov or at 954-828-4798. The number of residential flex units and commercial flex
acreage being requested should be included in the project narrative.

9) Indicate the project’s compliance with the following ULDR sections by providing a point-by-point
narrative response, on letterhead, with date and author indicated.
   a. Sec. 47-25.2, Adequacy Requirements;
   b. Sec. 47-25.3, Neighborhood Compatibility.
   c. Sec. 47-18.21, Mixed-Use Requirements; and
   d. Sec. 47-24.3.E, Conditional Use Requirements.

10) Provide the following changes on site plan:
   a. Provide an abstract survey, which the Site Plan shall be based off, showing the center line of all road
      rights-of-ways and site dimensions such as existing and proposed sidewalks, driveway entrances,
      parking space dimensions, easements and encumbrances, etc.
   b. Per Section 47-18.21.I.6- Mixed use Development, the minimum square footage for each multifamily
dwelling unit is four hundred (400) square feet. Provide unit size dimensions.
   c. Average maintained horizontal footcandle illumination on Sheet-A901, Site Lighting Plan, exceed
      requirements of Section 47-20.14. Consider reducing horizontal footcandle illumination between both
      buildings.
   d. Provide roof plan for all structures indicating the location of all mechanical equipment. This plan shall
      include spot elevations of the parapet wall and roof as well as mechanical equipment to verify
      adequate screening and to illustrate how equipment will be screened or shielded from view.
   e. All dumpsters shall be screened in accordance with the Dumper Requirements of Section 47-19.4.
      Provide a dumpster detail sheet for the proposed dumpster enclosure. Dumpsters should be
      relocated away from all street right-of-ways.
   f. Per Section 47-18.21.H.3 , Mixed-Use Requirements, “a mixed use development shall contain a public
      plaza open to the sky which includes pedestrian amenities such as landscaping, benches and
      fountains. The public plaza shall be a minimum size of one thousand four hundred (1,400) gross
      square feet and shall be located to provide the principal pedestrian access to the mixed-use
      development. A covered arcade with a minimum width of ten (10) feet may substitute for up to
      fifty percent (50%) of the above public plaza.” Update site plans to include a public plaza. Provide
dimensions and calculations on the site data table. As expressed in comment i.ii, below, the use of
an arcade may limit commercial storefront visibility based on the context of the area. Consider
excluding an arcade and integrating awnings and other similar shade and architectural elements.
   g. To support a smoother transition from nonresidential to residential uses along SE 16th Court and along
Davie Boulevard, consider the integration of dense landscaping.
   h. Section 47-25.3.3.e. Neighborhood Compatibility and Preservation, places importance on ensuring
development is compatible with, and mitigates adverse impact to, nearby adjacent neighborhoods,
which include the “placement or orientation of buildings and entryways, parking areas, bufferyards,
and alteration of building mass”, etc. Based on the characteristics of the site consider the following
site layouts. Reference Exhibit 1 and Exhibit 2:
      i. To create a natural transition from the commercial corridor of Davie Boulevard into the
residential neighbor located north of the proposed development, consider an internalized
parking garage, with lined residential uses along SW 12th Place, preferably consisting of first floor walkups. Limiting the number of floors on SW 12th Place will help reduce the impact to the residential neighborhood. Consider lining of the garage along the first floor of Davie Boulevard with commercial uses, with the upper levels consisting of residential units. The primary goal is to reduce surface level parking, by creating a street wall along Davie Boulevard with lined active uses, and tree lined streets to mitigate any adverse impacts to nearby adjacent neighborhoods.

ii. An alternative consideration is creating a street wall along Davie Boulevard, placing two mixed use buildings along the property’s frontage, placing a plaza between both buildings. Positioning buildings along Davie will allow repurposing of the rear parking lot for future development. Additional landscaping along Southwest 12 Place and SE 39th Avenue would be necessary to create a substantial buffer between the surface level parking lot and the residential neighborhood. Additionally, to increase visibility of businesses along Davie Blvd consider the removal of the proposed arcade/ building overhang and provide shading devices, such as awnings. Inverse building articulation along Davie Blvd by recessing the mid-section of the building (residential lobby and overhead residential units) and bring the remainder of the building (commercial floor area and overhead residential units) forward. In addition to required plaza area, consider additional ground floor common areas and amenities.

i. Guidance to the design principles along Davie Boulevard can be found within the “Davie Boulevard Corridor Master Plan”. Link: https://www.fortlauderdale.gov/home/showdocument?id=3981

11) Provide the following changes on the elevation plans:
   a. Show setback dimensions from the property lines on the elevation pages.
   b. North facing building should contain additional building articulation along SW 12th Place.
   c. Label building materials on elevation drawings and provide graphic examples of material.

12) The City’s Vision is to support sustainable infrastructure. Consider employing green building practices throughout the project such as, but not limited to; charging stations, tank-less water heaters, rain collection systems, pervious pavement where appropriate, bio-swales, Florida Friendly™ plant materials, solar panels and green roofs.

GENERAL COMMENT

13) Please note any proposed signs will require a separate permit application.

14) If a temporary construction/sales trailer is needed for this project, provide the details and location of the trailer on a separate site plan, to avoid additional review in the future. Verify details and location with the Building Representative.

15) Applicant will be required to pay a Park Impact Fee for the proposed residential units prior to issuance of building permit in accordance with ULDR Sec. 47-38A, Park Impact Fees.

16) An additional follow-up coordination meeting may be required to review project changes necessitated by the DRC comments. Prior to routing your plans for Pre-PZ and/or Final DRC sign-off, please schedule an appointment with the project planner (call 954-828-4798) to review project revisions and/or to obtain a signature routing stamp. Please note applicant is responsible for obtaining signatures from all discipline members that had comments and may need to resolve comments through individual appointments if necessary.

17) Additional comments may be forthcoming at the DRC meeting. Please provide a written response to all DRC comments within 180 days after comments have been received.
