LOBBY ART GALLERY

August 2019 Featured Artist: Paul McDermott

Paul depicts the art of the human experience through observation and interaction with the world. He explores the planet to capture simple, yet profound moments that leave viewers as if they were there themselves.

Transporting the viewer to a specific moment in time provides an opportunity for awareness and presence.

Paul has been a photographer since the age of 14. His teen years began in photo labs and continued with a pursuit of technical photography skills in college. Paul has received numerous acknowledgements for his work including two National Exhibit Merit Awards from Professional Photographers of America in 2018, two in 2017, two in 2015, and three in 2014. He was published internationally in the Professional Photographers of America's "Loan Collection Book" in 2014 and earned two Loan Collection Awards in that competition. Other awards include the 2008 Ocean City Arts Center "Best in Show" award and the 2005 Scholastic Art Awards "Portfolio Gold Key Award."

More recently, Paul has been producing personal projects in tandem with a successful commercial photography career. In 2019, he decided to devote his efforts into exhibiting his unique collections and expressing himself as an artist. For more information, visit <https://www.pmcdravels.com>.
