DEVELOPMENT REVIEW COMMITTEE (DRC) COMMENT REPORT

MEETING DATE: October 8, 2019

APPLICANT: River Lofts on Fifth, LLC.

PROJECT NAME: River Lofts on Fifth

CASE NUMBER: R19066

REQUEST: Site Plan Level II Review: 368 Multifamily Residential Units in Downtown Regional Activity Center

LOCATION: 307 SW 5th Street

ZONING: Regional Activity Center - Southwest Mixed Use District (RAC-SMU)

LAND USE: Downtown Regional Activity Center (D-RAC)

CASE PLANNER: Randall Robinson
Case Number: R19066

CASE COMMENTS:

1) Provide the FBC Building Type designation on the plans.
2) Indicate FBC Accessibility designations for Fair Housing.
3) Designate Sprinkler System Coverage.
4) Show Provisions for either Open or Closed interior Parking per FBC 406.5 or 406.6.
5) Provide Accessible Travel Details for the Site per FBC Accessibility.

GENERAL COMMENTS

The following comments are for informational purposes. Please consider the following prior to submittal for Final DRC:

1. The Florida Building Code shall apply to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.
2. All projects must consider safeguards during the construction process. Florida Building Code Chapter 33 delineates various safeguards that may apply during the construction phase. All structures associated with the protection of pedestrians will require a separate permit. A licensed professional must sign and seal the plans and specifications.
3. The City of Fort Lauderdale is a participating municipality in the National Flood Insurance Program (NFIP). The requirements specific to the City of Fort Lauderdale can be found in Chapter 14 - FLOODPLAIN MANAGEMENT of the Code of Ordinances and accessed at: https://www.municode.com/library/fl/fort_lauderdale/codes/code_of_ordinances?nodeId=COOR_CH14FLMA

Please consider the following prior to submittal for Building Permit:

1. On January 1, 2018 the 6th Edition of the Florida Building Code was adopted. All work described in Section 101.2, of the Broward County Administrative portion of the Florida Building Code, will govern the administration and enforcement of the proposed work. Each building and or structure will require a separate permit. The following websites will assist in the design considerations;

General Guidelines Checklist is available upon request.
Case Number: R19066

DEDICATION OF RIGHTS-OF-WAY: Per ULDR Section 47-25.2.M.5, property shall be conveyed to the public by plat, deed or grant of easement as needed in accordance with the Broward County Trafficways Plan, the city's comprehensive plan, subdivision regulations and accepted applicable traffic engineering standards:

a. Provide permanent Sidewalk Easement as appropriate along the northern side of SW 5th Street and along the western side of SW 3rd Ave to accommodate portion of a 5 ft pedestrian clear path that may be located beyond public Right-of-Way. Show / label proposed easement delineation in the plans and coordinate with TAM.

b. Provide 10' x 15' (min.) permanent Utility Easement for any 4 Inch or larger water meter and/or the first private sanitary sewer manhole located within the proposed development (for City Maintenance access); show / label delineation in the plans as appropriate.

CASE COMMENTS:

Prior to Final DRC sign-off, please provide updated plans and written response to the following review comments:

1. Meet the City’s Adequacy requirements to services provided to the public (fire service, water, wastewater, stormwater, transportation, etc.), per ULDR Section 47-25.2 of the City’s Code of Ordinances. Assess potential demands and impacts on City services and prepare a design for each that utilizes existing water, wastewater, stormwater, and transportation infrastructure to adequately serve this project. If the adequate infrastructure is not available, prepare a design that extends/expands the connection to the nearest City system to adequately serve this development.

2. Proposed required on-site improvements (i.e. building terrace, building foundation, building overhang, etc.) shall not be constructed within the requested sidewalk easements.

3. Provide disposition of existing light poles and anchor, and any other utilities within the adjacent right of way that maybe impacted by the proposed development.

4. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10’ measured from intersection point of pavement edges), alleys with alleys (15’ measured from intersection point of extended property lines), alleys with streets (15’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35. Ensure sight triangles are also depicted on adjacent driveways that would be impacted by proposed improvements on this project.

5. Discuss dumpster enclosure/ trash pick-up access requirements with case planner and waste management. Clearly depict trash enclosure on site plan. Show truck turning movements in and out
the proposed dumpster enclosure/building as applicable. Ensure sufficient height clearance is provided within garage for truck access. Per ULDR Section 47-19.4.D.6, all dumpster enclosures and adjacent service access drive shall be placed on poured concrete, solid or perforated interlocking concrete block paving (ICB), or any existing hardened paving system. Per ULDR Section 47-19.4.D.7, dumpsters serving restaurants require grease traps, oil/sand separators, and drains connecting to sanitary sewer. Please be advised, any floor drain that connects to sanitary sewer shall meet the design storm frequency of 100-year and duration of 3-day flood elevation requirements.

6. Provide and label typical roadway cross-sections at all driveway access points, on-street parallel parking lanes, and at landscape swale areas.

7. Improve portion of existing unimproved 14' Alley (fronting proposed development) with paving and drainage (per Public Works standards) to mitigate projected increase in vehicular traffic within Alley from proposed development.

8. Extend sidewalk/curb and gutter along SW 5th Ave west of the existing Alley to mitigate projected increase in pedestrian traffic within public sidewalk from proposed development.

9. Depict existing sidewalk adjacent to the development along SW 3rd Ave and how proposed sidewalk/pedestrian path will transition into existing sidewalk.

10. Concrete sidewalk to be continues across all driveway access point. Design driveway tie-in per the City’s Driveway Plan Detail Sheets (Right-of-Way), available online at http://www.fortlauderdale.gov/home/showdocument?id=1524 via the City’s website.

11. Label on Site Plan Data Table the required and proposed type of loading zone(s) required, per ULDR Section 47-20.2 Table 2 and Section 47-20.6; also label location of ADA van-accessible parking stalls. If applicable, show truck turning template circulation (label typical minimum centerline turning radius) entering and exiting the site as required for the proposed development. Turning geometries and loading zone design shall be in accordance with ULDR Section 47-20.6.

12. Show and label dimensions for dead-end parking spaces as appropriate for vehicular turnaround. Per ULDR Section 47-20.5.C.4, dead-end parking areas shall be prohibited, except where the number of parking spaces in the dead end area is less than 21 and a turnaround area is provided which will accommodate a 2-point turn around by a standard passenger car (AASHTO “P” Design Vehicle) or where the number of parking spaces in the dead end is 10 or less.

13. Depict proposed building doors and provide sufficient grades/details on conceptual paving, grading and drainage plans to verify ADA accessibility design for the site, especially ground floor access to the new building, as well as crossing proposed driveways and connecting to existing sidewalks (at intersections and with adjacent property) as appropriate; coordinate proposed site grading and 1st Level Finished Floor Elevations to meet ADA accessibility requirements.

14. Within adjacent City Right-of-Way, staging/storage will not be allowed, construction fence shall not encroach within intersection corner sight triangles, construction fence gates shall not swing into the public Right-of-Way, and any loaded Jib Crane radius shall not extend beyond private property boundaries. Any City Right-of-Way closure over 72 hours requires a Revocable License Agreement, processed by Property Right-Of-Way Committee (DRC) and approved by the City’s Commission, prior to Right-of-Way permit issuance by the Department of Sustainable Development for Maintenance of Traffic.
Prior to submitting Administrative Review (i.e. DRC Level I) application to request Revocable License Agreement, please contact Dennis Girigen at 954-828-5123 or dgirisgen@fortlauderdale.gov to discuss proposed scope of closure within City Right-of-Way.

15. Discuss if pedestrian lighting is proposed; if not, discuss the possibility of the addition of pedestrian lighting along City Right-of-Way, which requires perpetual maintenance by the Applicant via a Maintenance Agreement executed with the City. Please contact the Case Planner for details to match the area.

16. Provide Maintenance Agreement Area Exhibit, which provides a visual representation of the area within the adjacent public Right-of-Way (adjacent to the proposed development) to be maintained in perpetuity by the developer. Label whether the adjacent Right-of-Way is FDOT, BCHCED, or City jurisdiction, as well as label all proposed improvements, including asphalt and other specialty paving, specialty sidewalks, landscaping, irrigation, lighting, curb and gutter etc. that will be maintained by the Applicant throughout the life of the improvements. Be advise, any required perpetual maintenance of newly constructed exfiltration trenches, inlets, etc. within adjacent City Right-of-Way will typically revert back to the City, upon successful inspection/acceptance by Public Works after 1-year warranty period.

17. Please email CRBARRETT@FORTLAUDERDALE.GOV to obtain copies of the City utility maps as applicable to the project location and show existing City utilities and easements (water, sewer, forcemain, and stormwater utilities) in proposed engineering plans (utility demolition, stormwater pollution prevention plan (SWPPP), and civil plans).

18. Label proposed water service connections and sewer lateral sizes and material on conceptual Water and Sewer Plan. Sanitary sewer clean out must be provided at property line per City standards. Also provide disposition of existing services (i.e. water services and sewer laterals).

19. Any road cuts for utilities or curb cuts within City Right-of-Way shall be restored to full lane width for 50’ minimum length (by contractor), per City Code of Ordinances Section 25-108; show and label in plans as appropriate. Verify with FDOT and/or BCHCED their requirements for any milling and asphalt pavement restoration in vicinity of proposed road cuts for utilities and/or curb cuts within their respective Right-of-Way jurisdictions.

20. Conceptual Paving, Grading, and Drainage Plan:
   a. Provide sufficient existing and proposed grades and information on conceptual Paving, Grading, and Drainage Plan and details to demonstrate how stormwater runoff will remain onsite (include typical cross-sections along all property lines as appropriate, typical lot grading for the proposed single family homes within the development, and depict how the new stormwater system will connect to the existing on-site drainage system), and how the proposed project improvements (i.e. on-street parking, sidewalks, etc.) will not adversely impact the adjacent Right-of-Way and properties. Show location of building roof drains, and their proposed connection(s) to the on-site drainage system. Label existing City storm manholes/inlets.
   b. Drainage mitigation shall be required for any impacts within the adjacent City Right-of-Way such as increased runoff or reduction of existing storage/treatment due to proposed improvements, in accordance with the City of Fort Lauderdale Comprehensive Plan (Ordinance C-15-08), Objective 4.1 under Infrastructure Elements. Engineer of Record (EOR) shall evaluate the adjacent City roadway system capacity and demonstrate that the proposed improvements will not negatively impact the City’s existing drainage system and provide recommendations in compliance with the City’s Comprehensive Plan (i.e. meets or
exceeds the 10-year/1-day storm event drainage criteria). Applicant shall be responsible for maintenance of these proposed storm drain infrastructure improvements located within City Right-of-Way during a 1-year warranty period, until accepted by the City’s Public Works Department. (coordinate as appropriate with the respective FDOT and BCHCED agencies for mitigation of additional runoff within those jurisdictions).

c. Please note that private stormwater infrastructure (drainage pipes, wells, or basins), Trees, or Permanent Structures (fences, walls, etc.) are not permitted in City Right of Way or City drainage easements. Please remove any proposed stormwater systems, trees, or permanent structures that are not in compliance with this requirement or provide appropriate documentation of City Rights-of-Way or easement vacated to allow the construction of private underground utilities.

21. Provide storm runoff calculations, signed and sealed by a Florida registered professional engineer, which demonstrate how minimum criteria regarding adjacent street crown, water quality and finished floor elevations are met, as well as how the 25-year, 3-day storm event is maintained on site with zero discharge to Right-of-Way and adjacent properties (Pre vs. Post analysis will only be allowed in areas that are not flood-prone). Please also comply with the City of Fort Lauderdale Comprehensive Plan (Ordinance C-08-18), Objective 4.1 under Infrastructure Elements, and be advised that effective 7/1/2017, all projects must comply with the Broward County ‘Future Conditions Average Wet Season Groundwater Level’ map.

22. If dewatering activities are anticipated, a notarized City dewatering affidavit shall be filed at City’s building department when submitting a demolition or foundation permit along with any applicable dewatering permit form regulatory agencies such as the South Florida Water Management District or Broward County Department of Environmental Protection.

23. Exfiltration Trenches:
   a. Provide exfiltration trench for all on-street parking areas (i.e. within City Right-of-Way adjacent to the proposed development) and corresponding drainage calculations.
   b. Provide drainage inlet (per City standard details and specifications) on each end of exfiltration trench located within City Right-of-Way.
   c. Provide at least one clean out structure at each end of exfiltration trench located within the property.

24. Clarify design intent of site grading in the vicinity of proposed building, especially with regards to fill requirements per City’s Code of Ordinances Chapter 14 – Floodplain Management, including Ordinance C-14-26. Please contact the Floodplain Manager, Richard Benton at 954-828-6133 or rbenton@fortlauderdale.gov.

25. Contact the Floodplain Manager, Richard Benton at 954-828-6133 or rbenton@fortlauderdale.gov regarding proposed Finished Floor elevation and fill requirements per City’s Code of Ordinances Chapter 14 – Floodplain Management, including Ordinance C-14-26. Provide correspondence and depict information on plans accordingly.

26. Show and label all existing and proposed utilities (utility type, material and size) on civil and landscaping plans for potential conflict. A min. 5 feet and 10 feet horizontal clearance horizontal separation is required between city utilities infrastructure and proposed small and large trees, respectively (including proposed water and sewer services to the development). Any new trees (located within or adjacent to City Right-of-Way) should be placed with sufficient horizontal and vertical distances (per City, County, and State guidelines) to / from City’s public infrastructure, including stormwater assets, to allow for continued Public Works maintenance without obstruction. If this cannot be accommodated due to field conditions, then the developer shall relocate the existing City’s public infrastructure to resolve the conflict(s) and to comply with City’s, County’s & State’s
27. Discuss how surface runoff from the proposed development (between building and Right-of-Way boundaries) will be mitigated such that it won't be conveyed into the adjacent existing public storm drain infrastructure, and whether additional infrastructure will be required within City Right-of-Way (coordinate as appropriate with the respective FDOT and BCHCED agencies for mitigation of additional runoff within those jurisdictions). Show location of building roof drains, and their proposed connection(s) to the on-site drainage system.

28. Evaluate the possibility of utilizing a sustainable stormwater approach with the possibility of low impact (cisterns, pervious pavers, bioswales, raingardens, etc.) uses for landscaping along the streetscape.

29. Please provide an erosion, sedimentation, and stormwater pollution prevention plan (SWPPP) showing the adjacent City’s existing stormwater system. A copy of the approved SWPP shall be at the construction site from the date of demolition initiation to the date of final construction activities. CCTV Notes, Pollution Prevention Notes, and Dewatering Notes to be added to the SWPPP can be found on our website.

30. For Engineering General Advisory DRC Information, please visit our website at https://www.fortlauderdale.gov/home/showdocument?id=30249

31. Additional comments may be forthcoming at the DRC meeting and once additional/ revised information is provided on plans.
CASE COMMENTS:
Please provide a response to the following:

1. The City has adopted Florida Friendly Landscaping requirements into our ULDR Section 47-21. This basically means that plant material must be grouped together based on watering needs (hydro zone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Plant material species must be minimum 50% Florida Friendly Landscaping. Planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Illustrate hydro zones on planting plan, and include calculations in table.

2. Utilities and site amenities such as walkways, flagpoles, transformers, fire hydrants, sewer and water supply lines, trash enclosures, and similar items located on the site shall not be placed adjacent to, in, or under required tree planting areas, as per ULDR Section 47-21.12. Confirm with civil, site and life safety plans that utilities and site amenities are not causing conflicts with proposed landscaping. Where conflicts exist, shift the utility and/or site amenities.

3. Light fixtures with an overall height of more than ten feet shall be located a minimum of 15 feet aware from shade trees, as per ULDR Section 47-21.12.

4. Within the RAC districts, and as per Chapter 4 of the Downtown Master Plan Design Guidelines, at intersections where street with shade trees converge, it is encouraged to have tall palms at the immediate corners to provide a visual marker. This also helps to frame the street from the perceptive of the automobile in creating a sense of space. Provide tall palms species at the corner of the street intersection in addition to the canopy street trees.
   a. Please look into proposing three (staggered height) individual signal cane palms (minimum16 feet OA) installed as a cluster with each palm a maximum 5 feet apart at their base to frame the corner.

5. Within the Downtown RAC district and as per Chapter 4 of the Downtown Master Plan Design Guidelines newly planted shade tree street trees are suggested to be a minimum of 20-22 feet tall; 10-12 feet spread with 6 feet canopy clearance and provided on 30 feet centers within the curb.
   a. SW 5th ST Please add additional street trees. Downtown Master plan allows for shade trees a minimum horizontal clearance of 12 feet to a structure. The Live Oak tree has space that shifting towards the structure will allow room for street trees. It also appears that the comer palm has room to be shifted towards the east to provide additional room for street trees.
   b. Master Guidelines of shade tree street trees separation of 30 feet is a maximum length, street trees may be proposed within the 30 center.
   c. Guidelines call for continuous street trees within the sidewalk adjacent to the traffic lane within the curb. SW 3rd AVE at the Ride Share location, please propose a street tree between the sidewalk and traffic lane within the curb.
   d. The city looks for continuous shade trees as for the use of street trees. The island at the Drop off area, in place of the proposed Sabal palms please continue the shade canopy trees.

6. Section 47-21.12.A.2.a.Perimeter landscape area. Along the perimeter of a parcel of land which abuts a street, exclusive of vehicular access points, a perimeter landscape area shall be provided. The depth of the perimeter landscape area shall be a minimum of five (5) feet, a maximum of
twenty-eight (28) feet, and an average of ten (10) feet. The ten (10) feet of perimeter landscape area closest to the VUA may be counted as part of the twenty percent (20%) minimum VUA landscape requirement.

a. Vehicle Use Area at the Drop Off location requires a minimum 10 feet average landscape buffer area depth from the property line back up onto the site.

7. West side of the site along the building, please consider redesign to provide additional landscape area that trees and palm trees may be proposed to help soften the building for a more aesthetically pleasing neighboring view.

8. Please consider FPL right Tree Right Place when proposing trees and palm trees adjacent to overhead powerlines.

9. In lieu of tree grates, the City of Fort Lauderdale prefers the use of a cold applied, poured in place tree grate system that is designed to bind a selection of decorative aggregates, which provide a bonded, walkability, attractive and porous surface for tree pit such as ADDAPAVE TP, etc.

**GENERAL COMMENTS**

The following comments are for informational purposes.

Please consider the following prior to submittal for Building Permit:

1. A separate sub-permit application for Tree Removal, Relocation, and General Landscaping for site is required at time of master permit submittal. These are Landscape and Tree permit application documents different than the Broward County standard applications. Please note at this time of DRC submittal.

2. Proposed landscaping work in the City's right of way requires engineering permit and approval (GLandscape permit). This approval requires documents to be submitted for Engineering review. Note that Landscape will not approve permit review without these Engineering documents being submitted.

3. Provide separate Plumbing sub permit application for irrigation. Irrigation plans are required at time of Building permit submittal. Plans are to be in compliance with ULDR 47-21.6.A.11 and 47-21.10. Note that planting areas are to be irrigated on a separate zone than the turf areas so that once the plants are established, that particular zone can be shut off based on the season. The overall goal is to decrease water use through irrigation. Plant material must be grouped together based on watering needs (hydrozone) and turf areas must be limited and/or consolidated to less than 50% of the landscaped area. Illustrate hydrozones on planting plan and include calculations in table.
**Case Number:** R19066

**CASE COMMENTS:**

Please provide a response to the following:

1. Residential and retail (Bike Shop) unit’s entry and exterior doors should be solid, impact resistant or metal.

2. Residential units’ entry doors should be equipped with a quality secondary deadbolt locking system and have a 180 degree peephole or view port for security.

3. Retail unit doors exterior doors should be equipped with burglary resistant lock systems like door pins or lock security plates.

4. Residential and retail units should be pre-wired for an alarm system.

5. The site should be equipped with a comprehensive CCTV system that is capable of retrieving an identifiable image of an individual on site. The system should cover all entry exit points, parking garage, common areas, mail room, storage areas, elevator lobbies, retail cash management areas and any sensitive area of the site.

6. Ground level stair doors should be egress only or access controlled. Stair doors into floors should be access controlled.

7. All elevator lobbies and / or elevators should be access controlled.

8. The parking garage resident’s levels should be equipped with vehicular access control systems to prevent unauthorized intrusion or access to resident’s vehicles.

9. All glazing should be impact resistant.

10. Light reflective paint should be used in the parking garage to increase visibility and safety.

11. Easily identifiable emergency communication devices should be available at the pool areas, common areas and the parking garage.

12. There should be child proof safety features to prevent unsupervised children access to the pool.

13. Retail tenant employees should only have access to their respective duty areas and not to the residential tenant amenities area unless their duties require it.

15. Office doors and common area doors should be lockable from the inside to provide safe shelter in the case of an active threat such as an active killer event.
GENERAL COMMENTS

It is highly recommended that the managing company make arrangements for private security during construction. Please submit responses in writing prior to DRC sign off.
Case Number: R19066

CASE COMMENTS:
Please provide a response to the following:

1. Garbage, Recycling and Bulk Trash shall be provided.

2. Recycling reduces the amount of trash your business creates and it is the best way to reduce monthly waste disposal costs and improve your company’s bottom line.

3. Solid Waste Services shall be provided by a Private Contractor licensed by the City.

4. Service Days shall be: No restriction for Commercial collection. Service may not occur earlier than 7:00 am or later than 10:00 pm within 250 feet of residential.

5. Solid Waste Collection shall be on private property container shall not be placed, stored or block the public street to perform service (large multifamily and commercial parcels).

6. Containers must comply with 47-19.4

7. Draw equipment on plan to show it will fit in trash room.

8. Solid Waste transport to trash rooms or to primary waste container shall be performed inside building using interior service corridor (Retail, Office, Condo, Hotel).

9. Provide letter from chute company indicating make and model of proposed equipment and that it will meet the capacity needs of building.

10. Trash Room services will be handled by private collector, or Trash Room services will be done by on site personnel, or Trash Room services will be done by custodial staff.

11. Provide on the site plan a garbage truck turning radii for City review. Indicate how truck will circulate within property.

12. Submit a Solid Waste Management Plan on your letterhead containing name of project, address, DRC case number, number of units if applicable, and indicate whether it is Pre or Final DRC.
   - This letter is to be approved and signed off by the Sustainability Division, and should be attached to your drawings. Please email an electronic copy to smccutcheon@fortlauderdale.gov. Letter should include an analysis of the expected amounts of solid waste and recyclables that will be generated (if different from current capacity), and container requirements to meet proposed capacity.
   - Community Inspections will reference this Solid Waste Plan for sanitation compliance issues at this location.

GENERAL COMMENTS

The following comments are for informational purposes. Please consider the following prior to submittal for Final DRC:

1. None
Case Number: 19066

CASE COMMENTS:

1. Submit a traffic impact statement and coordinate with the Transportation and Mobility Department regarding traffic calming and a traffic impact study if needed. If a traffic study is needed Pursuant to 47-25.2.M.4. Applicant must fund City’s review by consultant and pay a $4,000 deposit prior to scheduling a methodology meeting after which the study will be prepared, transmitted and reviewed by the City’s consultant. Staff and consultant’s review concerns shall be adequately resolved prior to gaining authorization for either the Planning & Zoning Board or City Commission hearings. Take into consideration that the review of this study, once submitted, will take about 4-6 weeks once all documents are received.

2. Provide a property survey.

3. Ensure sidewalk is a minimum of 7 feet wide on SW 3rd Ave & SW 5th St. This minimum is in reference to clear, unobstructed pathways -Light poles, trees and landscaping is not to be included in this zone. Landscaping should be between the sidewalks and back of curb and a minimum of 4 feet in width.

4. Back of sidewalk should begin on the ultimate right of way/easement dedication line.

5. Provide pedestrian lighting along the sidewalks.

6. Remove the proposed “porte cochere/drop off area”.

7. Change the proposed drop off area into parallel on street parking.

8. The city reserves the right to meter on street parking stalls in the public right of way at any time.

9. All loading and unloading must be contained on site including postal delivery services and rideshare pick up and drop off.

10. Are gates being proposed at the driveways? If so show where on the site plan.

11. Show inbound and outbound stacking requirements from the property line to the first conflict point according to sec 47-20.5 General design of parking facilities for each driveway.

12. Is valet parking being proposed? For information on the required vehicular reservoir requirement for valet parking, please look at the section in our city code listed below:
   a. Sec. 47-20.17. - Vehicular reservoir spaces for drive-thru facilities. Valet parking facilities, 50 spaces or more are required to have a minimum 6 vehicular reservoir spaces.
   b. A vehicular reservoir space (VRS) is a space within a vehicular use area for the temporary stopping of a vehicle awaiting service as provided in this section. A VRS shall be twenty (20) feet long by ten (10) feet wide. A VRS shall be located in an area within a parking facility which is not used for any other vehicular use such as access, parking, site circulation or loading.
   c. Each VRS shall be clearly defined on the site plan and shall be in a location that does not conflict or interfere with other traffic entering, using or leaving the site. Design configuration shall be such that there shall be no backing into the street permitted.
d. Reservoir spaces shall be measured from the front of the service position to the rear of the VRS.

13. Public right of way/public streets must not be used for site circulation purposes.

14. Per ULDR Section 47-2.2.Q, show and label sight triangles as appropriate for safe and adequate access of drivers and pedestrians, on the Site Plan, Landscape Plans, and Civil Plans: intersections of driveways with streets and alleys (10’ measured from intersection point of pavement edges), alleys with alleys (15’ measured from intersection point of extended property lines), alleys with streets (15’ measured from intersection point of extended property lines), and streets with streets (25’ measured from intersection point of extended property lines). The request for reduction of sight triangle dimensions is subject to review by the City Engineer on a case-by-case basis. Per ULDR Section 47-19.1.E, no accessory use or structure shall be permitted within a sight triangle except as provided in ULDR Section 47-35.

15. Bicycle parking is needed. Consult the APBP Bicycle Parking Guidelines, city of Fort Lauderdale Parking Standards and Broward County End-of-Trip Bicycle Facilities Guide. Provide the minimum long term and short term bicycle parking based on requirements in the guide and include total counts on the site plan data sheet.

16. Ensure all access points, sidewalks, walkways, and curb cuts are unobstructed and ADA accessible with appropriate slopes and detectible warning devices and indicate on the site plan.

17. Additional comments may be provided upon further review.

18. Signature required.

**GENERAL COMMENTS**

Please address comments below where applicable.

1. Contact Benjamin Restrepo at 954-828-5216 or brestrepo@fortlauderdale.gov to set up an appointment for final plan approval.

2. The City’s Transportation & Mobility Department encourages the use of sustainable materials such as permeable pavement and electric car charge stations and installation of multimodal facilities such as bicycle pump stations and bike lockers.

3. Please note that any work within the City’s right-of-way will require an MOT approved by Transportation and Mobility and Engineering for permitting. Any full closures of roadways, alleys, or sidewalks that are over 72 hours will require a Revocable License Agreement (RLA) with the City of Fort Lauderdale.
CASE COMMENTS:
Please provide a response to the following:

GENERAL COMMENTS

1. The applicant is strongly encouraged to contact neighbors adjacent to, as well as condominium and neighborhood associations located within three hundred feet (300’) of the development site, to advise of this proposal (a listing of officially-recognized associations is provided on the City’s website: www.fortlauderdale.gov/neighbors/civic-associations and a map of neighborhood associations may be found at: http://gis.fortlauderdale.gov). Please provide acknowledgement and/or documentation of any public outreach.

2. The site is designated Downtown Regional Activity Center (D-RAC) on the City's Future Land Use Map. The proposed use is permitted in this designation. This is not a determination on consistency with Comprehensive Plan Goals, Objectives and Policies.

3. Verify that copy of plat is the most current recorded plat, including notes and amendments, for the proposed site. Provide documentation from the Broward County Planning Council verifying that the site does not require platting or replatting. If replatting or platting is not required, contact the Development Review Services Section of the Planning and Environmental Regulation Division of Broward County at (954) 357-6637 to ensure that proposed project is consistent with the latest recorded plat restriction.

4. Please contact Karina Daluz, Broward County Planning and Development Division kdaluz@broward.org or 954-357-6623 to ensure the proposed plat note language meets their standards before moving forward. Please provide staff with written response from the County.

5. Development applications requesting residential dwelling units in the Downtown Regional Activity Center (RAC) are subject to unit availability at the time of Development Review Committee (DRC) approval, and remaining available units will be allocated at the time of site plan approval on a first come, first served basis. In the event RAC units are not available, an applicant may request flex units or in the event there are insufficient number of RAC units to allocate to an entire project, the unit allocation may be divided between RAC units and flex units. Staff will advise the applicant on the status of unit allocation during the DRC approval process.

6. As this application requests dwelling units in the D-RAC, the proposed project requires a 30-day request for review period by the City Commission. A separate submittal, application and fee is required for City Commission 30-day request for review. Should the Commission call up the application, the applicant is responsible for all public notice requirements (Section 47-27). Note: The City Clerk's office requires 48 hours' notice prior to a Commission meeting if a computer presentation is planned i.e. Power Point, to be provided on CD or flash drive and a copy submitted to the City Clerk, contact the project planner for more information (954-828-5265). Please note units will be allocated to pending projects based on order of project approval.

7. Indicate the project’s compliance with the following ULDR sections by providing a point-by-point narrative response, on letterhead, with date and author indicated.
   a. Section 47-25.2, Adequacy Requirements;

   Development Review Committee October 8, 2019 15 of 27
b. Section 47-25.3, Neighborhood Compatibility Requirements, including Section 47-25.3.A.2, Smoke, Odor, Emissions of Particulate Matter and Noise and Section 47-25.3.E, Neighborhood Compatibility and Preservation; paying particular attention to compliance with criteria specified for any development located in the RAC-TMU district.

8. Arrange plans set as indicated in DRC Site Plan application.

9. Provide the following changes on site plan:
   a. Follow Local Street Section on 5th Street and 3rd Avenue, adjust building footprint accordingly; and,
   b. Return vehicular drop-off to previous location and design it such that it appears as a pedestrian plaza that cars may traverse, rather than the opposite.

10. Provide the following changes on elevations:
    a. Per Downtown Master Plan guideline B9 liner of habitable space concealing public-facing parking garage facades is preferred;

11. See Design Review Team (DRT) comments attached for further detail on review of plans and elevations.

The intent of the following Downtown Master Plan guidelines are not met. Specifically, please address the following guidelines:

S7  Maximum spacing for street trees: Palms -22 feet; Shade trees – 30 feet;

B2  Framing the street: encourage open space site requirements for use as pedestrian public space instead of unusable, leftover ‘green perimeter’;

B9  Upper floors of a parking garage should not be visible along primary streets, waterways, and parks. Active spaces on the upper floors are encouraged as a preferred design;

B15  High rises to maximize active lower floor uses and pedestrian-oriented design at ground floor;

B24  The Fifth Façade: Encourage green roofs as visual amenities that provide a combination of usable; landscaped spaces (recreation & open space benefits) and sustainable roof treatments (environmental benefits);

Q3  Durability and Quality of Materials: Encourage high quality materials for the entire building, with special emphasis on detailing and durability for the first 2 floors;

Q5  Parking Podium Façades: Where structured parking must be exposed to the street, exceptionally creative solutions should be explored;

Q7  Creative Façade Composition: Encourage a rich layering of architectural elements throughout the building, with special attention to facades below the shoulder level;

SF3  Encourage durable materials for ground floor retail and cultural uses;
12. On sheet A6, South to North Diagram and Allowable Envelope Diagram are incorrect. In the Near Downtown Character Area residential floor plates may be up to 18,000 square feet for buildings 15 stories in height or less. For residential buildings between 16 and 30 stories in height in the Near Downtown, floor plates of entire tower must be 12,500 SF or less.

13. It is recommended the following pedestrian and bicycle-related comments be addressed:
   
   
   b. Consider installation of a B-cycle bike-sharing station as an amenity for employees and patrons. Contact Jeff Torkelson, Executive Director, Broward B-cycle, 954-540-7609, jtorkelson@browardbcycle.com. Broward B-cycle now also offers electric-powered bikes.

14. This property is located within an Archaeologically Significant Zone identified through a phased archaeological survey of Broward County conducted between 1991 through 1995 by Archaeological and Historical Conservancy, Inc., and is periodically updated by Broward County. In accordance with City of Fort Lauderdale’s Comprehensive Plan, Volume I, Historic Preservation Element Objective 1.11, Policy 1.11.2., and as per the Certified Local Government Agreement between the City of Fort Lauderdale and the State of Florida, Department of State, Division of Historical Resources, that states that the City shall generally follow a public policy of protecting, preserving, and planning for the protection and preservation of resources of historical, architectural, and archaeological value are within its jurisdiction, a Cultural Resource Assessment Survey (also known as a Phase I Archaeological Survey) of the property shall be conducted by the applicant.

   A phase I archaeological survey must be conducted within the subject property prior to any ground disturbance activities and if necessary, in coordination with demolition of the extant structures. The phase I archaeological survey must be submitted prior to applying for building permits. The survey shall be performed by a professional archaeologist who meets the Secretary of the Interior’s Professional Standards (36 CFR part 61 as amended) and shall be conducted in accordance with Chapters 267, Florida Statutes and Chapter 1A-46, Florida Administrative Code. In the event that significant archaeological materials or unmarked human remains are encountered then the archaeologist shall alert the City’s historic preservation staff to coordinate the discovery and take measures to implement Chapter 872.05 Florida Statutes as it pertains to the discovery of unmarked human remains. Upon completion of the survey, a final archaeological survey report shall be submitted to the City’s Historic Preservation Planner, Trisha Logan (tlogan@fortlauderdale.gov / 954-828-7101) for review, determination of significance, and additional actions. The report should detail the survey and include an assessment of significance of any discoveries and recommendations.

15. Provide roof plan indicating the location of all mechanical equipment. This plan shall include spot elevations of the parapet wall and roof as well as mechanical equipment to verify adequate screening and to illustrate how equipment will be screened or shielded from view. In addition, indicate all mechanical equipment within the subject site on the site plan and elevations where applicable. Height is measured to the slab for flat roofs and use of the roof by residents or customers is limited based on this maximum height.
16. The City’s Vision is to support sustainable infrastructure. Consider employing green building practices throughout the project such as, but not limited to; charging stations, tank-less water heaters, rain collection systems, pervious pavement where appropriate, bio-swales, Florida Friendly™ plant materials, solar panels and green roofs. For instance, consider a green sustainable roof, as part of this site plan. Green roofs help to conserve energy, improve air quality and may provide an extra amenity space.

17. Provide legible photometric plan for the entire site. Extend values on photometric plans to all property lines. Show values pursuant to ULDR, Section 47-25.3. A.3.a and 47-20.14. Indicate pedestrian lighting poles on site plan and landscape plan and provide detail with dimensions. Garage internal lighting fixtures and glare cannot be visible from neighboring properties.

18. This project is subject to the requirements of the Downtown RAC Education Mitigation Agreement. The applicant will notify the School Board Superintendent or designee of the proposed project and provide the City with a written response from the School Board prior to final DRC approval. Provide a School Capacity Availability Determination (SCAD) letter that confirms that capacity is available, or if capacity is not available, that mitigation requirements will be satisfied.

19. Applicant will be required to pay a Park Impact Fee for the proposed residential units prior to issuance of building permit in accordance with ULDR Section 47-38A, Park Impact Fees.

**GENERAL COMMENTS**

The following comments are for informational purposes. Please consider the following prior to submittal for Final DRC:

20. All construction activity must comply with Florida Building Code (FBC) Section 24-11, Construction sites. Contact Frank Rabinowitz, Structural Plans Reviewer (954-828-5237), to obtain his signature on the final DRC plans.

21. Additional follow-up coordination meeting may be required to review project changes necessitated by the DRC comments. Prior to routing your plans for Final DRC sign-off, please schedule an appointment with the project planner (954-828-5265) to review project revisions and/or to obtain a signature routing stamp.

22. Provide a written response to all DRC comments within 180 days.

Please consider the following prior to submittal for Building Permit:

23. If a temporary construction/sales trailer is needed for this project, provide the details and location of the trailer on an additional site plan, to avoid additional review in the future. Ensure details and location receives approval from the Building Services Division’s DRC Representative.
### PRINCIPLES OF STREET DESIGN

</table>

**B1** Framing the street: building “streetwall” should generally meet setback line (within a percentage).

**B2** Framing the street: encourage open space site requirements for use as pedestrian public space instead of unusable, leftover ‘green perimeter’.

Follow Local Street Section. In urban context such as proposed, any “leftover ‘green perimeter’ should be given over to sidewalk clear-path or wider tree planting strip.

**B3** Framing the street: minimum and maximum building ‘streetwall’ heights (see character area guidelines for specifics).

**B4** Framing the street: encourage maximum building ‘streetwall’ length of 300 feet.

Provide all four building length and width dimensions on plan, as totals as well as subparts.

**B5** Preferred maximum ‘floorplate’ area for towers (see character area guidelines for specifics).

Provide DMP dimensional requirements in site analysis as well as site data table on site plan.

**B6** Where towers are located on Primary (>60 feet wide) and Secondary (<or = 60 feet wide) Streets, the towers are encouraged to orient towards the Primary Street.

**B7** Where towers are located on streets <or = 60 feet, increased stepbacks from the ‘shoulder’ are encouraged to reduce the impact on the street.

**B8** Surface parking: discourage frontage and access along ‘primary’ street.

**B9** Parking garages: encourage access from secondary streets and alleys.

All garage access is encouraged from alley.

Encourage street level activities and minimize visual exposure of parking, with active space on the ground floor of a parking garage.

Ground floor plan is well laid-out. This makes the six unlined parking spaces facing 3rd Avenue especially regrettable and unadvisable.

Consider other uses in their place such as a B-cycle bicycle sharing station and/or kayak storage, as site is short distance from river.
| B10 | Encourage main pedestrian entrance to face street. | √ |
| B11 | Maximize active uses and ‘extroverted’ ground floors with retail in strategic locations. **Ground floor plan is well laid-out. This makes the six unlined parking spaces facing 3rd Avenue especially regrettable and unadvisable.** Consider other uses in their place such as a B-cycle bicycle sharing station and/or kayak storage, as site is short distance from river. As proposed, naturally-lit, ground floor utilitarian spaces along 3rd Avenue may provide a model for future development. However refinement appears to be required. |
| B12 | Encourage pedestrian shading devices of various types. **It is not clear if an arcade is proposed along 3rd Avenue. Please clarify and coordinate plans, diagrams and perspectives.** |
| B13 | Encourage balconies and bay windows to animate residential building facades. |
| B14 | In residential buildings encourage individual entrances to ground floor units (particularly in the Urban Neighborhood Character Area). |
| B15 | High rises to maximize active lower floor uses and pedestrian-oriented design at ground floor. Repeated from B11 **Ground floor plan is well laid-out. This makes the six unlined parking spaces facing 3rd Avenue especially regrettable and unadvisable.** Consider other uses in their place such as a B-cycle bicycle sharing station and/or kayak storage, as site is short distance from river. As proposed, naturally-lit, ground floor utilitarian spaces along 3rd Avenue may provide a model for future development. However refinement appears to be required. Repeated from S12 **Vehicular drop-off area should be designed such that it appears as a pedestrian plaza that cars may traverse, rather than the opposite.** |
| B16 | Building Design guidelines do not apply to Civic Buildings and Cultural Facilities. |
| B17 | Discourage development above right-of-way (air rights). |
| B18 | Mitigate light pollution. Through effective screening and/or fixture shield detail, insure that garage lighting will not be visible from surrounding streets. Provide details. |
| B19 | Mitigate noise pollution. **Comply with Code of Ordinances Chapter 17 - Noise Control in the Code of Ordinances of the City of Fort Lauderdale, Florida regarding mechanical noise baffling requirements.** |
| B20 | Vertical open space between towers on adjacent lots: Towers are encouraged to maintain vertical open space alongside and rear lot lines: minimum horizontal distance of 30 feet (abutting property owners can coordinate tower placement as long as maintain 60 feet clearance). Provide DMP dimensional requirements on elevations, in site analysis as well as site data table on site plan. | ✓ |
| B21 | Vertical open space between multiple towers on a single development site: no less than 60 feet apart. | ✓ |
| B22 | Residential: Encourage minimum ground floor elevation of 2 feet above public sidewalk level for individual ground floor entrances to private units. | ✓ |
| B23 | Avoid drive thurs in the wrong places. | ✓ |
| B24 | The Fifth Façade: Encourage green roofs as visual amenities that provide a combination of usable, landscaped spaces (recreation & open space benefits) and sustainable roof treatments (environmental benefits). Pedestal roof is well-designed. Such is encouraged for tower roof. | ✓ |

**QUALITY OF ARCHITECTURE**

| Q1 | Skyline Drama: Encourage towers to contribute to the overall skyline composition. | ✓ |
| Q2 | Expressive Tops: Encourage expressive tops for tall buildings above 37 stories in Near Downtown and Downtown Core. | ✓ |
| Q3 | Durability and Quality of Materials: Encourage high quality materials for the entire building, with special emphasis on detailing and durability for the first 2 floors. Provide elevation details indicating cladding materials of first two floors. | ✓ |
| Q4 | Respect for Historic Buildings. | ✓ |
| Q5 | Parking Podium Façades: Where structured parking must be exposed to the street, exceptionally creative solutions should be explored. Provide elevation, plan, method of attachment and photographic details of garage screening. North and west facades of garage will be plain visible/prominent in the near term at least, and should be treated with similar level of creativity as facades facing streets. | ✓ |
| Q6 | Response to Natural Environment: Encourage architecture to respond to the unique nature of the south Florida environment (solar orientation, wind direction, rain). Examples: Open breezeway corridors oriented toward prevailing winds; energy efficient glazing; above ground stormwater capture and re-use through bio-swales and rain gardens; solar roof panels/awnings. Is arcade being proposed along 3rd Avenue? Please clarify. Describe building sustainability program. | ✓ |
| Q7 | Creative Façade Composition: Encourage a rich layering of architectural elements throughout the building, with special attention to facades below the shoulder level. Provide articulation for wall expanse above lobby frontage on 5th Street. | ✓ |
**STOREFRONTS**

### Lists and Specifications

**Plans to include the following:**
- **Cover sheet** including project name and table of contents;
- Zoning and Land Use maps of all properties within a 700' radius. This may be obtained from the Urban Design & Planning Office, 700 NW 19th Ave., Ft. Lauderdale, (954) 828-3266;
- **Current survey(s)** of property, signed and sealed, showing existing conditions. The survey should consist of the proposed project site alone excluding adjacent properties or portions of lands not included in the proposal;
- **Photos** (8x10 color) of existing conditions of adjacent sites and streetscapes;
- **Conceptual Site Plan** with footprints including shoulder and tower configurations for all proposed and existing buildings and showing all properties and improvements within one block from the project site, indicating existing and proposed buildings, with a graphic distinction made between existing and proposed structures, and identifying pedestrian and vehicular circulation paths including site access points and crossing points. Site Plan should include all site features and the following basic project data (in tabular form on site plan):
  a) Zoning, Land Use and Character Area designations
  b) Site area (square feet and acres)
  c) Residential: number of proposed dwelling units
  d) Non-residential: gross floor area, and areas of each specific use
  e) Parking data: parking number to be provided and all parking areas (on and off site) shown on plans
  f) Building footprint area at grade, total S.F. and as a percent of the total site
  g) Number of stories and floor plate sizes including floor area at each level where a step back is proposed, GSF
  h) Building height (expressed in feet above grade) for each major building element. And at each step back
- **Conceptual Floor Plans** at grade and at each level where a step back is proposed;
- **Conceptual Elevations**, all sides, showing dimensions of all proposed setbacks and step backs and showing all proposed architectural features or treatment;
- **Conceptual Sections** through the proposed project showing all adjacent structures and street profiles including the relationship to all across street structures. Sections should be provided anywhere significant variations in the pedestrian street experience will occur. Sections should identify any on-street parking, bulb-outs and landscape areas including dimensions;
- **Pedestrian Perspective renderings** at eye level from points at the street that will show each of the primary facades of the proposed structure(s) and its relationship to the adjacent surroundings as viewed by a pedestrian;
- **Aerial photo simulations** to indicate mass outlines of proposed structure(s) superimposed within the context of existing surrounding conditions, from opposing views.

### COMMENTS

1. **Site Plan with site data table is distinct from, and provides different information from, Landscape plan, is always required and should be first proposed plan in set.**

2. **Order and complete plans as specified on application(s). As presented site data, inclusive of DMP dimensional requirements, is difficult to glean.**

   - **Plans to include the following:**
     - **Cover sheet** including project name and table of contents;
     - Zoning and Land Use maps of all properties within a 700' radius. This may be obtained from the Urban Design & Planning Office, 700 NW 19th Ave., Ft. Lauderdale, (954) 828-3266;
