Thank you for submitting your New Service Application.

Once your payment has been processed, a work order will be generated for Public Works to install the new service(s).

When Public Works receives the work order, it is placed in the queue for installation.

New water services that require the water main to be tapped on a city road are typically completed within four weeks from the date the work order is received.

For properties that are located on County or State roads, this process can be two to four weeks longer due to the permitting requirements.

A Public Works Utilities representative will contact you to arrange a meeting at the property to determine the location of your new service.

You can check on the status of your application by calling the 24-Hour Neighbor Call Center at 954-828-8000. Please have the address of the project available.
