

Las Olas Isles Undergrounding of Overhead Utilities

The City of Fort Lauderdale is coordinating utility undergrounding efforts throughout the Las Olas Isles neighborhood to enhance safety and resilience for our neighbors. The work is being completed by crews from Ferreira Construction Co., Inc. and includes:

- undergrounding overhead utility wires through directional boring and limited excavations
- installing all new cables, conduits, transformers, and related equipment
- installing new underground electric and communication services to each home
- installing new streetlights and poles
- resurfacing streets and restoring curbing and landscaping as needed near new ground-mounted equipment facilities

Schedule

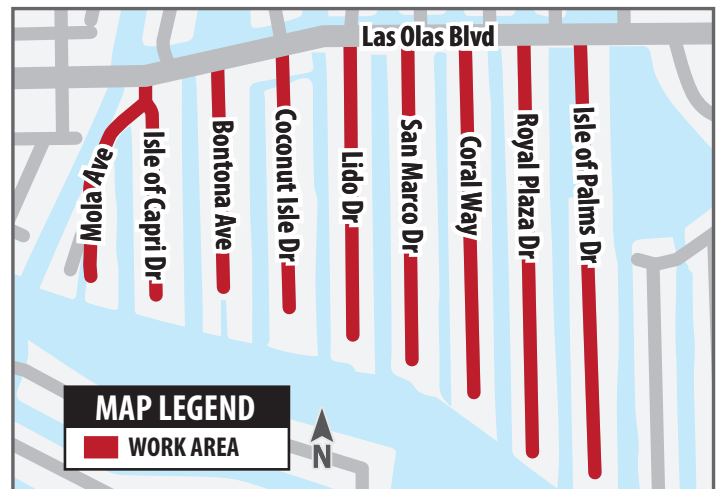

Construction began on in May 2022 and crews are moving east from Mola Avenue toward Isle of Palms Drive. Work is taking place Monday through Friday between 8 a.m. and 5 p.m. This schedule is subject to change due to inclement weather or other unforeseen conflicts. Overall completion is expected in fall 2023, though it is possible that utility companies may have additional work to do once the City's project is completed, including the installation of new cables and removal of existing poles.

Progress as of March 2023

Since construction began, crews have completed underground directional drilling of FPL, AT&T and Comcast conduit on all isles. The installation of FPL transformers and handholes has been completed on all isles. AT&T and Comcast handhole installation has started on Isle of Capri and Lido Drive. Work on individual residences for FPL, AT&T and Comcast has started on Isle of Capri and will continue east the week of March 27 starting with Mola Avenue and Bontona Avenue. Learn more and see progress updates at fllcity.info/lasolasislesutilities.

Access

As crews work on installing new FPL electric service connections and AT&T and Comcast conduit connections to individual residences, they will require access to the exterior of properties where this work is taking place. Access inside homes is not required and all construction team members will have visible proof of identification.

Traffic Impacts

- A single lane along each isle may be closed during work hours. Traffic control personnel will assist motorists as needed. Please follow posted signs and drive with caution in the area.
- There may be times when equipment or materials temporarily block access to driveways during work hours. Crews in the field will coordinate with neighbors during these situations.
- Driveway and roadway access will be restored at the end of each work shift.

We apologize in advance for any inconvenience and thank our neighbors for their continued patience as we work to complete this project as quickly as possible.
